

20/21 COLLECTION

WE DEVELOP GEAR THAT REFLECTS OUR DEMAND FOR ULTIMATE PERFORMANCE AND INNOVATION, OUR LOVE OF THE OUTDOORS AND THE PEOPLE WHO SHARE OUR PASSION.

WE CONSTANTLY REFINE OUR EXCLUSIVE DESIGNS AND CREATE NEW ONES TO EXTRACT THE HIGHEST PERFORMANCE FROM OUR HELMETS. WITH GREAT FIT AND STYLE, PRET HELMETS NEVER INTERFERE WITH YOUR PERFECT RUN.

DETAILS MATTER.

PRET X lives at the limits, developed with input from our professional athletes to conquer the most demanding conditions on the planet.

Places that don't have lifts or boundaries and product failure isn't an option.

X Series helmets provide the ultimate combination of performance and safety.

ADVANCED COMPOSITE TECH
ULTRA-LIGHTWEIGHT CONSTRUCTION

Pret created **ACT** to make the strongest and lightest weight helmets. **ACT** provides added protection in critical areas. Reinforcing materials in critical areas improve durability and safety.

TUNED VENTILATION

Designed to allow maximum possible heat and moisture escape under high stress and low flow conditions including hiking in the backcountry and standing in the lift line. Patented fully adjustable ventilation system. **Pat. No. 8,256,032**

NEW

③ TUNED VENTILATION
DIRECT ACTIVE CONTROL

Level C venting on the NEW Fury X controls all front and top venting with a single lever for the most ventilation control possible in any helmet. Whatever conditions call for - from hiking to extreme to front side - Level C sets the new professional level benchmark.

④ TUNED VENTILATION
DIRECT ACTIVE CONTROL

Level 4 venting on the Cirque X / Corona X opens up like no other helmet to allow for a massive amount of ventilation when you need it most, or shuts down when conditions call for protection from the elements.

③ TUNED VENTILATION
INDIRECT ACTIVE CONTROL

Level 3 offset labyrinth venting system actively removes heat and moisture via external vents offset from internal vents. No direct airflow on your head with complete control and adapts to all conditions.

① TUNED VENTILATION
DIRECT AUTOMATIC CONTROL

Level 1 is a highly effective system of linked intake and exhaust vents that regulate heat and moisture in all conditions with minimum weight. Open/Close vent flaps are integrated into the washable lining and can shut down vents when conditions warrant.

NEW FOR 20/21

The entire PRET lineup now features MIPS at all price points.

Every in-line model features the latest MIPS technology. The "C2" version eliminates the velcro under the LFL shell by utilizing a new low friction coating. The result is a slight increase in the fit of the helmets, while reducing weight and maintaining safety.

GOGGLE AND HELMET INTEGRATION

All Pret helmets are designed to optimize the fit and function of performance goggles and create a seamless integration system.

More than 20 years of helmet development experience results in the ultimate fit. This fit is universally praised as the best on the market. With 5 shell sizes offered, it guarantees everyone is covered.

Our proprietary quick release Pret Ripcord System (RCS) is compact, ergonomic and on-the-fly micro adjustable. 1 full turn of the dial covers 4 cm of range. Quick release: simply pull the dial out and the Ripcord fully opens.

CIRQUE X

Cirque X with Level 4 ventilation. The ultimate ventilation control. A true helmet for all conditions. Level 4 venting combined with the latest evolution of ACT takes durability & protection to the pro level. ACT combines Polycarbonate plates and overlaps to create the lightest and strongest helmet available. A full wrap lower shell combined with MIPS, the rock solid quick release RCS fit system, Fidlock buckle and X Static fabric complete the package.

NEW FURY X / VISION X

RULE NUMBER 1: REINVENT THE RULE BOOK

The **ALL NEW FURY X** resets the bar for performance, fit, safety and style.

A. Proprietary ACT Multi-shell construction with **NEW full-wrap lower shell**.

B. **Differential shell thicknesses** in specific areas for the greatest strength and lowest weight.

C. **NEW Integrated Goggle ventilation system**

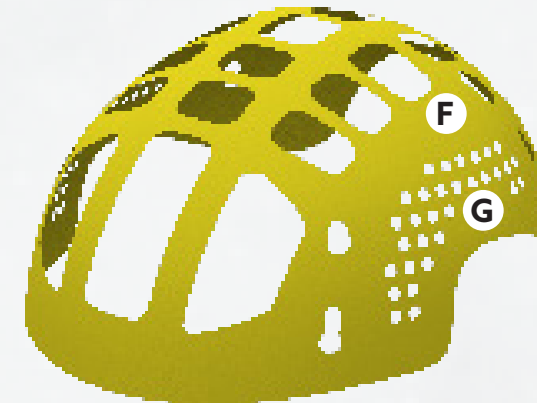

D. **Optimized density EPS liner and insert**

E. **NEW Level C Ventilation System**

Single lever controls the top and FRONT vents.

Level C venting on the **NEW Fury X** controls **all front and top venting with a single lever** for the most ventilation control possible in any helmet.

Whatever conditions call for - hiking, weather, extreme performance - **Level C** is sets the **new professional level benchmark**.

F. **New technology MIPS C2 liner** has a coating that lowers the friction and allows for the correct movement without having the soft velcro stickers between the liner and the EPS.

Because we have eliminated these velcro friction pads (still used in conventional MIPS helmets) we have achieved both a **closer fit to the original helmet design size** as well as **lighter weight**.

G. **Drilled for lightness.**

NEW FURY X

The completely NEW Fury X is the go-to helmet of Pret athletes and ambassadors across the globe. Fury X sets the new industry benchmark for professional level performance. **Level C ventilation** activates both front and upper vents with a single lever to establish the ultimate in adaptability for every condition. Combining the latest evolution of ACT with Level C venting creates the ultimate pro level helmet. Multi shell construction and a full wrap lower shell combined with MIPS, the rock solid quick release RCS fit system, Fidlock buckle and X Static fabric. **The new standard.**

RULE NUMBER 2: DON'T MESS WITH ICONIC DESIGN.

Without changing the style of the Cynic X we updated construction, performance and details while reducing weight.

A. Proprietary ACT Multi-shell construction with **NEW full-wrap lower shell**.

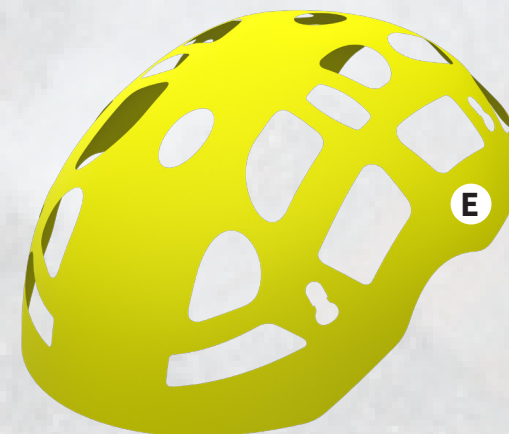

B. **Differential shell thicknesses** in specific areas for the greatest strength and lowest weight.

C. **Optimized density EPS liner**.

D. **Level 1** is a highly effective system of **linked intake and exhaust vents** that regulate heat and moisture in all conditions with minimum weight.

Open/Close vent flaps are integrated into the washable lining and can shut down vents when conditions warrant.

E. **New technology MIPS C2 liner** has a coating that lowers the friction and allows for the correct movement without having the soft velcro stickers between the liner and the EPS.

Because we have eliminated these velcro friction pads (still used in conventional MIPS helmets) we have achieved both a **closer fit to the original helmet design size as well as lighter weight**.

CYNIC X

The overwhelming choice of our professional athletes. Developed with their input and focused on performance and safety with MIPS® technology. The Cynic X is the ultimate low profile, light weight, and best fitting helmet. Performance, style and safety with direct Level 1 ventilation. Ultra lightweight ACT combines In Mold multi shell construction with overlapping PC shells for durability and protection. X-Static® fabric to keep it fresh. Audio ready featuring our detachable Covert Ear Covers.
