DYNASTAR

A SKIING STATE OF MIND

Born in Chamonix at the foot of the Mont-Blanc, DYNASTAR has been handcrafting high-performance skis for the world's most committed skiers for 50 years.

To this day, Chamonix serves as our base camp and home. Our skis are designed, built, and tested to excel amongst the world's most challenging and formidable terrain. We deliver the high-performance standards demanded by the world's best skiers, combined with the versatility and ease-of-use adapted to every skier's specific needs.

Since the beginning, DYNASTAR has continued ascending to new heights through technical innovation, competitive success, and a shared spirit for adventure.

We are committed skiers - driven to explore the limits of what's possible on snow. We continue to construct every ski with the precision, quality, and craftsmanship essential to bringing the most out of every skier, in every condition.

POWERDRIVE

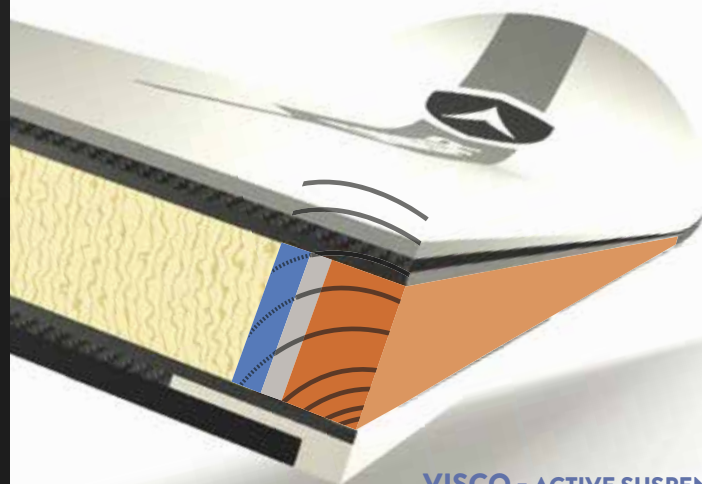

A SMOOTH TOUCH IN A HARSH WORLD.

An entirely new era in ski design, Dynastar's unique POWERDRIVE technology works like the chassis of a race car, effectively absorbing changes in terrain and unlocking the skis' natural flex to deliver smooth, dynamic power with ground-breaking control and edge grip.

POWER AND COMFORT ARE NO LONGER MUTUALLY EXCLUSIVE.

Race Department developed and Factory Team approved, POWERDRIVE supplies active suspension to the edge and plants the ski to the snow, eliminating instability to unleash quiet acceleration, incomparable edge grip, and an entirely new level of ultra-smooth, responsive ski control.

The patented, multi-layer sidewall (Visco / Metal / ABS) or "active" torsion box construction creates a vertical sheering effect, allowing the skis' core and sidewalls to flex harmoniously from tip to tail for unprecedented shock absorption and ski control.

VISCO = ACTIVE SUSPENSION
TITANAL = POWER BOOSTER
ABS = POWER TRANSMISSION

5-POINT SIDECUT

HIGH PERFORMANCE DOESN'T HAVE TO MEAN HARD-TO-USE.

Adapted to the specific rocker profiles and constructions found throughout the CHAM 2.0, POWERTRACK, and GLORY collections, our progressive 5-POINT SIDECUT is one of the key technical components to DYNASTAR's award-winning versatility and performance.

A TEMPLATE OF MODERN SKI DESIGN

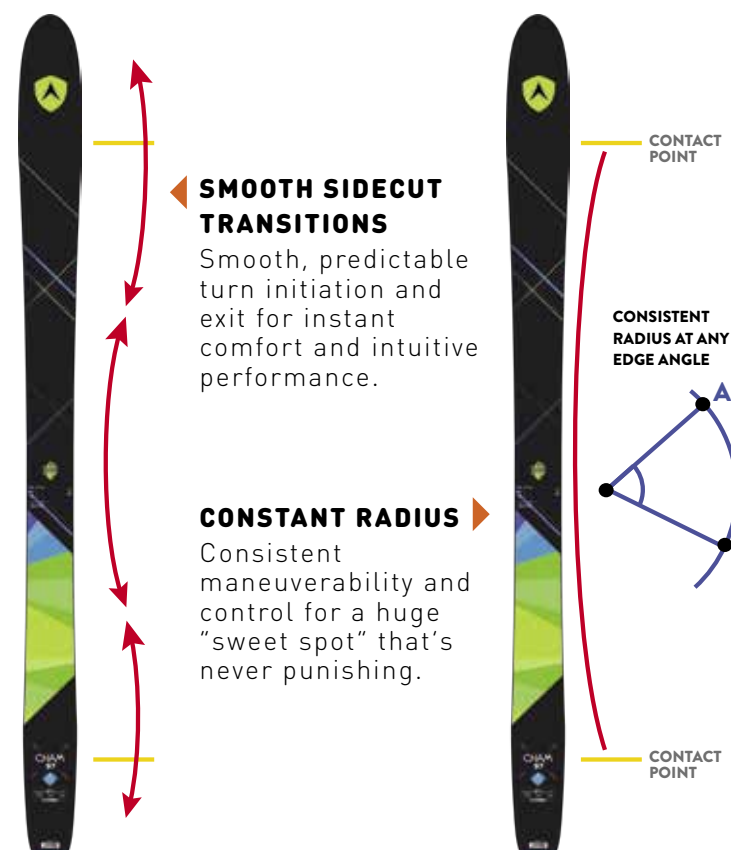

SPOON SHAPED TIP

Reverse sidecut in the tip offers reduced swing weight and superior tracking.

PIN TAIL

Reverse sidecut in the tail offers smoother turn exit for reliable speed control.

SMOOTH SIDECUT TRANSITIONS

Smooth, predictable turn initiation and exit for instant comfort and intuitive performance.

CONSTANT RADIUS

Consistent maneuverability and control for a huge "sweet spot" that's never punishing.

DYNASTAR

RIDE TOGETHER
WORK TOGETHER

WE WORK HAND-IN-HAND, DAY AFTER DAY, PEAK AFTER PEAK, TO HANDCRAFT
SKIS THAT PERFORM PERFECTLY FOR EACH ATHLETE'S OBJECTIVES.

To perform at the pinnacle of their sport, push preconceived boundaries, disrupt traditional convention while honoring all that has led here – a shared objective unites our athletes across every discipline and forms the core of Dynastar's FACTORY TEAM.

From the World Cup circuit to the Freeride World Tour to competitive ski mountaineering, Dynastar's R&D department is focused on translating the demands of these skiers, anticipating their ultimate needs, and developing the technologies and designs that will drive alpine performance to the next level.

Immediately recognizable due to the iconic orange and black, each "Factory Team Approved" product is the result of Dynastar's technical leadership and meticulous, handcrafted approach; a collaborative effort to conceptualize the innovations that will become the new performance standard of tomorrow.

From the very beginning, an avant-garde approach has been a part of our DNA. And it's this approach that allows us to deliver the technical expertise and real-time response required of the world's best skiers and the Dynastar Factory Team.

ON-TRAIL

WC SANDWICH LAMINATE CONSTRUCTION

- Poplar wood cores layered with titanal and/or fiberglass laminates
- Optimum power, balance, and stability
- Full-length vertical sidewalls for rock-solid edge grip

POWERDRIVE

- Active suspension eliminates deflection and instability
- Unlocks the skis natural flex for smooth, dynamic power
- Plants the ski to the snow for ground-breaking stability and grip

EARLY RISE ROCKER

- Powerful on-trail performance with enhanced ease-of-use
- Classic camber delivers power, stability and edge grip for confident and explosive carving
- Subtle tip rocker eases turn initiation for faster, more aggressive lines

SPEED ZONE

Enter the SPEED ZONE for an entirely new level of ultra-smooth on-trail power, precision and comfort. Dynastar's all-new, industry-first active suspension - aka Powerdrive - absorbs changing terrain, effectively planting the ski to the snow to unleash quiet acceleration, uncompromising power, and dynamic ski control.

WOMEN'S ALL MOUNTAIN

PROGRESSIVE 5-POINT SIDECUT

- Effortless maneuverability and smearing
- Quick, easy turns and speed control
- Carves and turns well on groomed snow

LIGHTWEIGHT PAULOWNIA SANDWICH CONSTRUCTION

- Paulownia wood core/fiberglass construction reduces weight by 25%
- Easier, fatigue-free performance and control
- Full-length vertical sidewalls maintain power, stability, and edge grip

NATURAL STANCE

- Complements a woman's physiology
- Stance angles and balance points tailored specifically to sidecut and profile
- Increased comfort, more efficient power transfer, and reduced fatigue

ALL-MOUNTAIN ROCKER

- Moderate tip and tail rocker with classic camber underfoot
- Initiates carved turns with ease, effortless maneuverability
- Powerful energy, shock-absorption, and edge grip

GLORY

A beautifully balanced blend of playfulness, versatility, and power, GLORY ushers in a new all-mountain standard for women. Tailored to complement the profile of the ski and a woman's physiology, the carefully designed lightweight wood core and finely-tuned balance points offer a huge "sweet spot" for increased comfort, more efficient power transfer, and reduced fatigue.

TWEEN / JUNIOR

TWEEN series skis are developed with award-winning rocker technology, forgiving flexes, and shorter sizing options that encourage progression for up-and-coming rippers to take their skiing to the next level.

Featuring a specifically designed rocker profile, JUNIOR series skis allow even the smallest skiers to use changing terrain to their advantage, making learning to ski a more intuitive process so progression comes quicker and easier.

COLLECTION
2016 / 2017

For over 50 years, **LANGE** has consistently been found on the feet of the world's best skiers. Our sole focus is **better-fitting, better-skiing boots**. And we are the premium benchmark.

BE PASSIONATE

Since the beginning our passion for foot mechanics, recognition of its subtleties in relation to skiing, and desire to help skiers perform better has resulted in some of the most important innovations in ski boot design.

BE FOOT-CENTRIC

Constant collaboration with the best boot-fitters in the racing and retail worlds, and 3D scans of more than 20,000 individual feet have led to a deep understanding of how the skiing foot functions.

BE PRECISE

We develop state-of-the-art solutions to address those hard-to-fit areas; solutions that provide comfort without sacrificing performance. We then tirelessly handcraft, test, and repeat to deliver the ultimate blend of comfort and performance for every foot shape.

BE ONE

A great-fitting ski boot is a skier's most essential piece of equipment. Consistently the best in out-of-box fit, only LANGE delivers the performance solutions, ensuring every skier that steps into a Lange will BE One with their boots.

BEone

LANGE has built its foundation, and success, on delivering the **best “out-of-the-box” fit** for every foot shape, coupled with the absolute **best performance** available in skiing today.

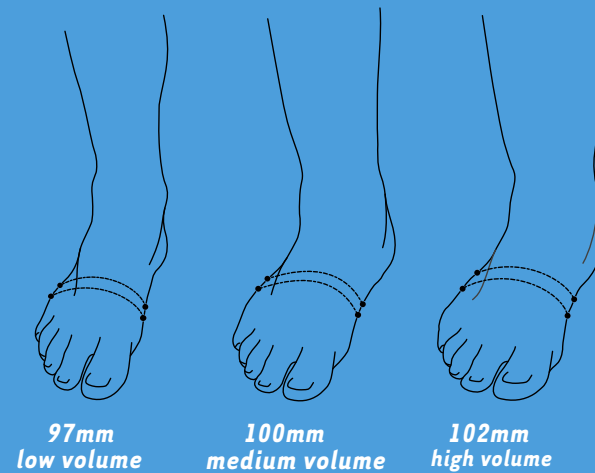

BEST “OUT-OF-THE-BOX” FIT

Not all feet are created equal.

Choose Your Width

Lange is the only brand to offer three unique lasts across every category: low (97mm), medium (100mm), and high volume (102mm), ensuring a true first-fit for every foot shape.

Control Fit Liner

Lange incorporates a common-sense approach, incredible craftsmanship, and the solutions that boot-fitters have used for years to eliminate common pressure points and hard-to-fit areas.

POWER WEDGE TONGUE:
eliminates the gap between the
shin and tongue, enhancing
precision and sensitivity

SADDLE STITCHED SEAMS:
no overlapping material
eliminates pressure points

CUSTOM TONGUE: designed
instep area to guarantee
maximum customization
to the skiers' instep

INSTEP POCKET:
reduces pressure
on the instep

ONE PIECE TOE BOX:
continuous material from toes to
shin provides greater toe comfort

Our **4 PILLARS** approach achieves a level of comfort and performance that simply can't be matched, ensuring that every skier that steps into a Lange will **BEone** with their boots.

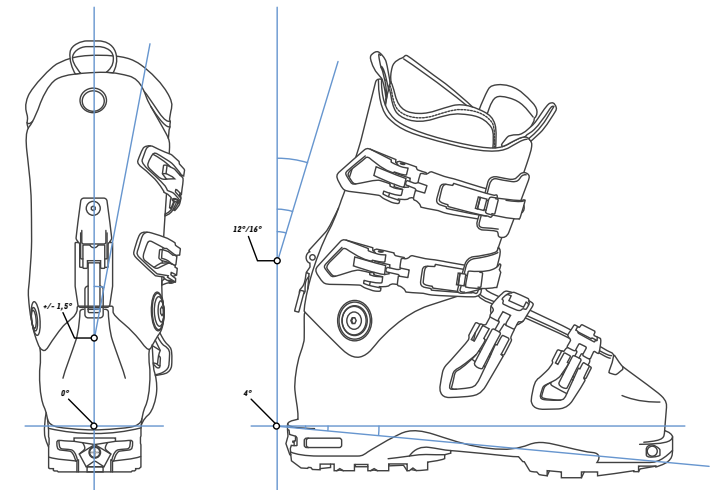

BEST PERFORMANCE

No compromise precision, response, and control for every level.

Natural Stance

Lange's neutral, upright stance allows more efficient power transfer on modern shaped and rockered ski designs, resulting in less quad fatigue for better, longer ski days.

Mono-Injection

Only the highest-quality plastics are used in Lange's mono-injected shells to allow pin-pointed customization while delivering the ultimate energy transmission, rebound, and response available.

INTRODUCING XT FREE TOUR

The best of both worlds is here. Lange's benchmark fit and legendary alpine performance meet the world of free-touring in the all-new, first-of-its-kind, XT FREETOURL. The solid sole design with Dynafit® certified inserts, new ultra-light shell and liner engineering, and Lange's patented ski/hike system with Power V-Lock redefines what a touring boot is capable of and creates a new freetouring benchmark in weight (1770 g) and performance.

1 4 PILLARS TECHNOLOGY

- CONTROL FIT LINER
- NATURAL STANCE
- CHOOSE YOUR WIDTH
- MONO-INJECTION

2 ULTRALON CUSTOM TOUR LINER

Lightweight touring liner with Ultralon foam delivers superior customization, insulation, and resistance to packing out. Motion Control provides protection and more comfortable range-of-motion when touring.

3 POWER V-LOCK/HIKE-SKI SYSTEM 2.0

Provides increased hiking range of motion (40°) due to a wider V-Lock, and a new metal-on-metal locking mechanism that creates powerful first-of-its-kind downhill performance.

4 SOLID SOLE W/ TECH INSERTS

Solid sole construction ensures secure, powerful energy transmission, and confident steering. DYNAFIT® certified inserts provide the most trust-worthy and dependable touring performance.

5 ULTRA GRIP WTR ROCKER SOLES

WTR rocker soles offer more comfortable hiking and touring with no compromise to downhill performance. Ultra-Grip provides increased traction, grip, and shock-absorption.

RS

RACE/ON-TRAIL

An unequaled blend of on-trail power, precision, and fit, the iconic RS series continues to be the industry benchmark and serves as the foundation for Lange's entire award-winning collection. The result of collaboration with the world's best boot-fitters, our unique 4 Pillars technology integrates the key fit and performance solutions to ensure the best "out-of-the-box" fit coupled with Lange's ultimate downhill performance.

1 4 PILLARS TECHNOLOGY

- CONTROL FIT LINER
- NATURAL STANCE
- CHOOSE YOUR WIDTH
- MONO-INJECTION

2 CHOOSE YOUR WIDTH

Key models are available in 97mm or 100mm (Wide) versions, delivering the highest levels of comfort and performance to a wider range of skiers and foot shapes.

3 SHORT CUFF (SC)

A shorter cuff (15mm in back/20mm in front) provides women and skiers with shorter leg shafts with a more natural stance for increased performance and comfort.

4 CUSTOM TONGUE

Designed with a hollow instep area for maximum customization where circulation is often cut-off and pressure points are common. More comfort, more warmth, more control.

SX ALL-MOUNTAIN

Based on the acclaimed RX all-mountain boot, the award-winning, 102mm SX series expands on "Choose Your Width" to ensure wider foot shapes no longer sacrifice a comfortable fit for real-deal performance. Featuring Lange's 4 Pillars technology, the SX "redefines the 102" by providing all of the key fit and performance solutions often limited to narrower, race-oriented boots.

1 4 PILLARS TECHNOLOGY

- CONTROL FIT LINER
- NATURAL STANCE
- CHOOSE YOUR WIDTH
- MONO-INJECTION

2 MONO INJECTED 102mm LAST

The first and only 102mm mono-injection boot delivers the highest performance without sacrificing comfort for wider foot shapes.

3 EASY ENTRY CONCEPT

Softer plastic insert over instep area allows easy, comfortable entry and exit.

4 REPLACEABLE GRIP SOLES

Increased traction, grip and shock-absorption for hiking and walking.

TEAM

The strongest junior offering on the market, TEAM series boots are designed around the same award-winning 4 Pillars technology as adult versions with enhanced junior fit features. Short Cuff (SC) models feature shorter upper cuffs, allowing more natural stance and range of motion for increased comfort and performance. Control Fit liners address the traditional hard-to-fit issues, alleviating common pressure points and increasing circulation for incredible comfort and warmth.

1 4 PILLARS TECHNOLOGY

- CONTROL FIT LINER
- NATURAL STANCE
- CHOOSE YOUR WIDTH
- MONO-INJECTION

2 MONO INJECTION

Provides a consistent flex in varying temperatures and allows easy customization for more precise comfort and fit.

3 SHORT CUFF (SC)

A shorter cuff (15mm in back/20mm in front) provides women and skiers with shorter leg shafts with a more natural stance for increased performance and comfort.
