FT FOR ~~3~~ GOOD ~~10~~ SKIING

EVERY GOOD STORY IS
WORTH RETELLING.

Our history is deep, yet fresh – built on a foundation of experience & design that has allowed us to remain true to the Original 3-Piece while creating a future of innovation. Join us, our athletes and engineers as we celebrate 10 years and begin this year creating the stories that will be retold again and again.

P. 03

During the late 60s and early 70s, NASA was in the early stages of developing the modern space suit. These suits, which would be used during the agency's first lunar missions to the Moon, had a large problem. The heating, cooling and electrical lines that ran throughout the suits, which powered the suit and kept the astronaut alive, would kink, crease and crimp when the astronauts would walk and flex their arms.

Enter Al Gross.

Gross with Dixie Rinehart and the NASA design team came up with the solution to include articulating hinges with ribs that allowed a natural flex in the astronaut's ankles, knees and elbows; preserving the shape and functionality around the joint.

Today, this technological feature is seen in everything from water pipes to flexible drinking straws.

Gross and Rinehart would eventually leave NASA and find their way to employment with a small research and development firm, Comfort Products, headed up by former racer Eric Giese. Giese applied their knowledge of space age technology to skiing while living in Aspen. The goal was simple: to enable the boot to flex without a bulge or distortion in the lower shell, which was one of the largest problems of the day with boot design - boots during the time period had no ankle hinge. No hinge meant any distortion caused a significant loss of control.

He developed many unique boot designs during this period that featured a floating ribbed tongue instead of an overlap. These designs would become the precursor to the original Raichle Flexon tongue. Tongue in hand, Giese approached the US distributor of Raichle and presented his concept with a rough prototype. Seeing the potential, Giese was flown to Switzerland to meet the president of Raichle Switzerland, Heinz Herzog.

Meeting after meeting, Giese found himself facing steep opposition to his new concept. The Swiss felt it too radical of a design, too different of a look for the conservative company. In one last effort, Giese leapt onto the conference table wearing one of his own prototypes and one of the company's own products, flexing them both in the process and showing the Swiss how their boot bulged and distorted under pressure which Giese's product kept its shape and aesthetics in tack. The decision to move ahead was obvious.

In the late 80s, only a few years into running the business, Werhan died in an unfortunate auto accident with his secretary in the car. Werhan's wife immediately inherited the company and took over its operations. Sadly, the company was never the same after Werhan's death and by 1996 the business was on the verge of bankruptcy. It was then that Raichle was purchased by Swiss banker Dr. Grosnick who was in the business of buying companies in distress. He purchased the Kneissl Ski Company shortly thereafter.

From the Olympics to the World Cup circuit to Freestyle competitions, no other boot could match its performance in part to the athletes that wore it and to its patented flex technology.

Despite its success and due to its unchanged design, the original Flexon boot was archived.

Knowing the 3-Piece concept worked, the new owners offered volume and lower priced versions of the original design but none ever delivered on the predecessor's performance, not understanding that no matter how many iterations of the original design were created, skiers would always come back asking for the original.

In 1999, insisting that the Kneissl brand offer a boot, Dr. Grosnick made the decision to rename all of the Raichle boots to Kneissl branded boots. The rebranding wasn't received well by consumers and only a year and half later, Kneissl was sold to the parent company of Roces.

From this point, the molds were bought and sold and passed around without much of being done with them, all the while maintaining a strong core following of skiers addicted to its performance. These pro athletes had built their careers on this boot as well as thousands of skiers like you whom also couldn't give them up. With a lack of production, everyone was suddenly forced to search for parts and boots on Ebay and scrounge ski swaps to keep them on their feet.

We're skiers. We're boot fitters and we know better than anyone that something had to be done. We took it upon ourselves to go back and search out the original molds and bring it back to life! Not in some new and distorted form, but in the original construction and design that had been proven over the past 25 years to be the most popular 3-Piece design in the world.

We purchased the original molds, tested every feature, kept what worked and then added some of today's most advanced technology to make them work even better, never stopping until we were skiing them again. We hope you enjoy these boots as much as we enjoy bringing them back to life. The revolution in 3-piece boot design started here, and will now continue from here.

FOR THE GOOD OF SKIING.

THE FULL STORY BEHIND THE MAKING OF A BRAND

We took it upon ourselves to go back and search out the original molds and bring the boot back to life! Not in some new and distorted form, but in the original construction and design that had been proven over the past 25 years to be the most popular 3-piece design in the world!

THIS IS THE LEGACY

ORIGINAL AND HAND CRAFTED IN ITALY

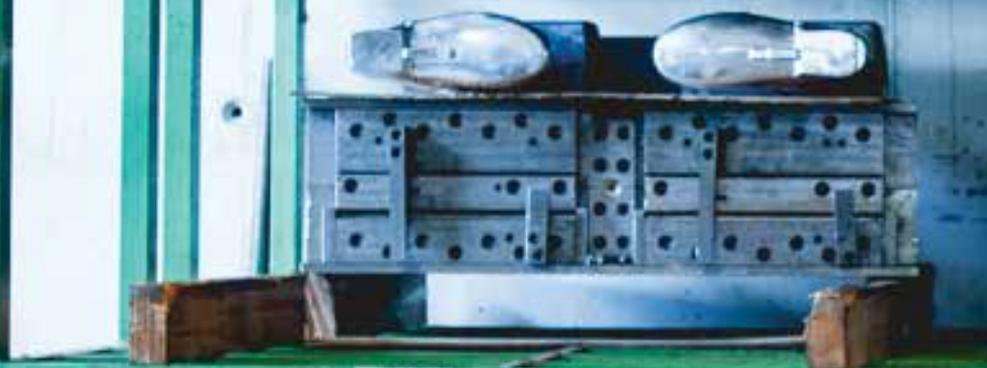

The design process for our newest boot, the Evolution Series, was a three-year process. While completely new from the sole up, the DNA of the Original 3-Piece boot resides well in its heart. Found in the Descendant & Plush boots, this 102 mm last ensures that anyone who demands a more comfortable experience on the hill can find it in a Full Tilt ski boot.

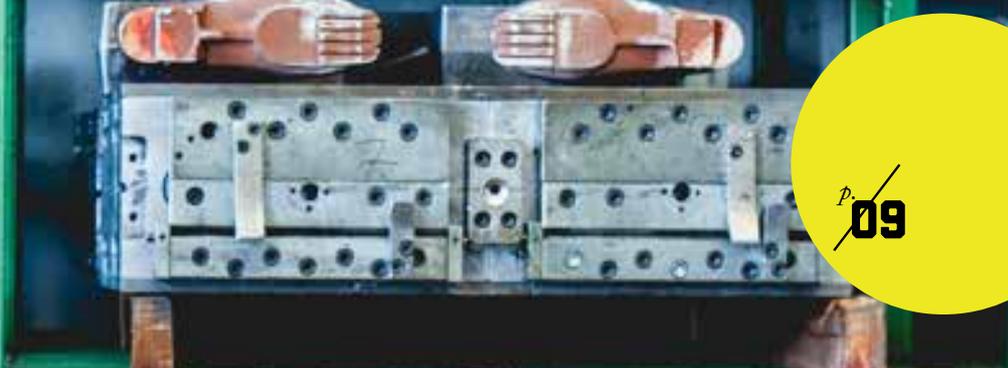

NICK MARSHALL

Nick, a design engineer based at the Full Tilt HQ in Seattle, WA is one of many people who has helped make our motto, "Comfort Is Performance" an undeniable truth.

SOUL

A TRANSCENDENTAL EXPERIENCE

The FTSSHELL takes the same 99mm last width and geometry used in the Original 3-piece design and incorporates a roomier toe box, allowing room for your toes to play. With the addition of the replaceable soles, you'll experience enough traction and durability to get through a slick parking lot or steep boot-pack.

THIS IS TECHNOLOGY

"MAGIC IS JUST SCIENCE WE DONT UNDERSTAND YET." - ARTHUR C. CLARKE

p. 12

ANY OF A BOOT

THREE PIECE
TECHNOLOGY

TE INDI

KNOWLEDGE IS POWER. KNOW YOUR BOOTS.

"THE WHOLE IS GREATER THAN THE SUM OF ITS PARTS." - ARISTOTLE

FLEXOMETER

Full Tilt boots have a flex range from 1-10 (soft-stiff) with an option for every riding style and condition.

3-PIECE

Up to 2lbs/900g lighter than other boots due to its smart and minimalistic 3-Piece design that eliminates the need for thick, heavy overlapping plastic or bolts.

RIBBED TONGUE

100% ribbed tongue enables smoother, more natural linear flex from your shin to your toe. The tongue bends like a flexible straw, never bottoming out while providing smooth rebound. No more shin bang!

CABLES

Cables wrap around the boot like a shoelace for even pressure and increased comfort while eliminating dead spots. Tightening your buckles does NOT restrict flex, unlike overlap boot designs.

ADJUSTABLE FLEX

The boot's flex is rated on a simple scale of 1-10 (10ffstiffest). Change a boot's flex by simply switching the tongue. (Competitor's boots require permanent cutting)

INFINITE PIVOT

Unlike traditional designs, the rear cuff never bottoms out. It pivots infinitely forward with your calf for less shell distortion, no shin pain and more control.

EASY ON/OFF

The front of the shell opens a full 90° to slide your foot in and out with ease in all temperatures. Like putting on slippers!

100% INTUITION™

All adult boot liners are built using authentic Intuition closed cell foam. It is body heat activated to mold 100% to your feet and shells during use, or can be instantly heat molded by a shop in minutes for a light, warm and super comfortable fit.

FOCUSED INTUITION™

Authentic Intuition™ closed cell foam in the heel pocket for critical heel hold and warmth. It is body heat activated to mold 100% to your feet and shells during use, or can be instantly heat molded by a shop in minutes for a light, warm and super comfortable fit.

J-BAR

An additional J-shaped piece of foam is inserted internally on both sides of the ankle area to dramatically increase ankle hold down, to keep your feet perfectly in place for precise control.

POWER WRAP

An additional layer of ergonomically shaped EVA is wrapped around the outside of the upper liner to increase energy transfer and horsepower to the shell.

A thinner foam is used in the front of the liner to increase space without sacrificing control for people with wider feet or who prefer a little more toe room.

GLOSSARY

CUSTOMIZABLE

All parts are sold separately for unlimited personalization and repair using a standard phillips head screwdriver.

ADJUSTABLE CUFF ALIGNMENT

Easy, precise lateral angle adjustment. Original & Soul shells: 12mm

FORWARD LEAN

Tool-less forward angle adjustment. Original & Soul shells: 3mm or 7.6mm

WIDETRACK BUCKLE

New adjustment mechanism engineered to increase precision and durability while maintaining on-the-fly single-handed micro adjustment. New durable aluminum lever with a minimalistic lightweight design.

RATCHET BUCKLE

Full Tilt's original adjustment mechanism providing on-the-fly single-handed micro adjustment. Our Ratchet Buckle features light-weight, economical nylon lever construction.

LADDER BUCKLE

The Ladder Buckle features an intuitive, easy to remember, macro-size adjustment, plus a micro-twist for fine adjustment with a light, easy-to-handle aluminum lever.

SHOCK ABSORBER BOOT BOARD

Soft rubber layer in the sole of the shell absorbs vibrations, impact and shock for a smooth ride.

RIGID BOOT BOARD

The Rigid Boot Board provides a firm layer in the sole of the shell maximizing responsiveness and sensitivity.

RUBBERSOLE

Replaceable rubber soles on the entire toe and heel dramatically increases grip when walking and hiking.

RUBBERHEEL

Our replaceable rubber heel improves grip and cushion when walking on hard surfaces.

CINCH POWERSTRAP

CINCH POWERSTRAP

Aluminum auto locking mechanism for instantaneous single handed adjustment while keeping the strap firmly in place for maximum power transfer.

WOMEN'S CUFF

The Women's Cuff is anatomically shaped to match a female's specific calf shape for increased comfort and control.

45° DEGREE HEEL LOCK

Keep heels where they belong. Placing the middle buckle at an optimal 45 degree angle creates a solid lock for the heel to stay put when pressuring the tips and tails of the skis.

MID GRIP

Whether you are climbing grated stairs or scrambling a rock on top of a mountain, a dual material or single material midgrip gives you the confidence to stay on your feet.

DUAL MATERIAL OUTSOLES

No slipping getting in-between you and the ground. A firm rubber and a softer TPU material combat wear and keep your feet underneath you on any surface.

10 NEW

CHAIR

"If these boots weren't around .. I'd pretty much be done skiing" - Seth Morrison / FT athlete

NEW FIRST CHAIR 10

TURN THE DIAL TO 10

The stiffest boot in the FT line and designed for those who demand power and response for anything in their way.

The First Chair 10 features the FTS shell, featuring a modern toe box for a roomier fore section and replaceable rubber soles for added traction and durability. The 10 flex tongue provides the necessary stiffness for those who want their boot to push back. This boot is perfect for those who want a hard-charging, pin it and win it feel.

FIRST CHAIR 8

ALL-TERRAIN, ALL THE TIME

When performance and power cannot be sacrificed, the First Chair 8 ski boot is the tool equipped to meet all the challenges of the mountain, be it on-piste or out of bounds.

Built on the FTS chassis, the First Chair 8 isn't a re-design of the Original 3-Piece but more a re-imagining. A modern toe box and replaceable rubber soles gives the boot added traction and durability. The 8 flex tongue proves a stiff yet responsive feel without being cumbersome, perfect for the skier who may prefer a more-resistant flex pattern.

EIGHT

"Having foam under the footbed and a soft boot board gives an incredibly comfortable feel on big impacts, probably the best I have tried." - Tom Pietrowski / Boot Fitter

DESCENDANT 8

WHEN COMFORT AND PERFORMANCE MATTERS

A wide foot deserves the same high performance and design as a narrower foot and it's found in the Descendant 8.

Featuring the Evolution Shell, the Descendant 8 incorporates all the best of the 3-Piece Design while adjusting accordingly for a wider footprint. From the sole up – this boot is something special! Built on a 102 width last that features dual material soles for added traction and durability with an upgraded buckle system for easy on & off. It's 8 flex tongue provides a stiff yet responsive feel for those skiers who enjoy more push back from their boot.

- Adjustable Cuff Alignment • Infinite Pivot • Adjustable Forward Lean • Light Weight

DESCENDANT 6

HIGH LEVEL PERFORMANCE IN A MID-FLEX PACKAGE

When width matters, the Descendant 6 combines a versatile flex pattern for those who want a more cushioned feel and expanded width for a roomier footprint.

For those who have had second thoughts about trying FT because of the original's narrower 99mm shell, this is the boot for them. The Descendant 6 features the newer, roomier Evolution Shell which comes complete with dual material soles, a burly buckle system and a 6 flex for a go-everywhere feel.

- SHELL:** FTE Evolution 3-Piece Shell
- WIDTH:** 102 mm

P. 24

"The 45° degree middle buckle really locks your heel down." - Khai Krepela / FT Athlete

DESCENDANT 4

A WIDER BOOT FOR WIDER FEET

3-piece DNA evolved for those freestyle skiers who prefer the wider, roomier housing of a 102 last and a flex pattern that is more forgiving.

Like the rest of the Descendant Series, the Descendant 4 features the Evolution Shell which was designed to meet the needs of today's skiers who have wider feet and want to enjoy the comfort and performance of the Original 3-piece boot. Replaceable soles, a 102 mm last and upgraded buckle system paired with a 4 flex tongue make this boot the perfect choice for those who want a manageable flex pattern – great for softer landings in and out of the park.

SHELL:	FTE Evolution 3-Piece Shell

SIZES:	MP 23.5 - 27.5 US W 6.5 - 10.5 EU 37 - 42.5

- Additional features include:*
- 3-Piece Boot Construction • Customizable • Ribbed Tongue • Adjustable Flex
 - Adjustable Cuff Alignment • Infinite Pivot • Adjustable Forward Lean • Women's Cuff

"I spend my days coaching ski racing and freeskiing in the trees and these boots are perfect for both! My feet are always cold, but not in these boots! I can spend more time on the snow since my toes are warm!"
 - E. Currie / Skier / Online Review

FOUR

YOUTH

"My daughters feet grow as fast as the grass, it's awesome to keep her in the same boots for more than a year!"
- Eric Pollard, pro skier & father

GROWTH SPURT

GROWS WITH YOUR KID'S FEET! 3 SIZES IN ONE!

This unisex boot literally grows with your kid's feet! Sold in 2 sizes, the Growth Spurt is adjustable to 3 full foot sizes to save on the family budget. With the same comfortable natural ankle flex and warmth as our adult boots, these feature an elastic neoprene liner that comfortably stretches with your child's growing feet. Spend less time in the shop to replace outgrown equipment and more time charging bell-to-bell with the future pro!

- SHELL:** Adjustable
- LINER:** Expandable
- BUCKLE:** Ladder
- SOLE:** Replaceable Heel & Toe
- WEIGHT:** 1.316 grams
- SIZES:** SMALL - MP 18 -21.5
LARGE MP 22 - 25.5

Additional features include:

- 3-Piece Boot Construction • Ribbed Tongue
- Infinite Pivot

EXPAND AS YOU GROW

PRO AFTERMARKET LINER

STEP UP WITH THE PRO

We put a great deal of thought into our Pro Aftermarket Liner. We use 3 laminates specifically engineered to provide the most energy transfer to shell while maintaining warmth in a light weight and custom moldable fit. In addition we've included Powerwrap and J-Bar making this moldable liner a must have.

PRO LINER CONSTRUCTION:

4mm - Open Cell

Ensures warmth and comfort straight out of the box.

2mm - Intuition™ RD

Medium density & hardness for a solid balance of comfort & performance

7mm - Intuition™ HD

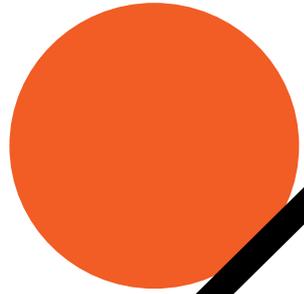

High density & firm for a responsive and efficient transfer of energy.

Powerwrap

Increases efficient power transfer directly to the shell of the boot.

PRO AFTERMARKET LINER

COMPATIBLE WITH ANY SKI BOOT IN THE WORLD

P. 36

PACK

BOOT PACK

FROM HOME TO HILL

The best ergonomic pack to lug your boots and everything else from the house to hill just got better! We re-designed and reinforced key zones, added features to separate the good from the smelly with venting and streamlined our zipper configuration to allow you to change your boots on the wet ground without stepping in mud.

VOLUME: 40 L
SIZE: 50 X 37 X 26 CM

Additional features include:

- Dedicated ski boot puzzle storage
- Large main compartment with big access opening
- Pleated panel that expands for internal helmet storage
- Exterior stretch mesh side pockets
- Front tool pocket
- 600 denier poly ripstop

It's an after-market party, and everyone is invited!

A skier with happy feet is everyone's #1 goal! In order to achieve that, Full Tilt offers a full range of parts available for upgrading, customizing or replacing any piece of a skier's treasured Full Tilt Boot. Capable to fit boots past and present, the FullTiltBoots.com parts hub offers an intuitive search to find the part a skier is looking for. The online order is fulfilled by the closest shop to offer the fastest customer service possible for even the most obscure needs. No more hunting tag sales and back basement bins to get that part you need!

Full Tilt Parts Kits and separate pieces are designed to give you the versatility to upgrade, customize and replace any part you need. It's all about you after all.
