

2016/2017

ARMADON

HARDGOODS

**WELCOME**

---

Armada was founded to challenge assumptions and realize new standards of performance. Today, Armada's hardgoods are the intersection of technology, style and design.

In 2016/17, we celebrate that heritage of rebellious innovation in the ARV: our flagship all-mountain freestyle ski that defines versatility and utility for skiers looking to turn the entire mountain into their own terrain park. Since the company's birth in 2002, the ARV has been part of our lineup, cultivating a legacy as the one freestyle ski that can do it all – from jump lines, to jibs, to tight turns in the trees.

A more robust offering of women's skis, including the brand new Victa Series of all-mountain rippers, adds depth to the Armada hardgoods collection.

These additions join the already established and acclaimed VJJ 2.0, TSTw and brand new ARW to create Armada's most complete women's collection to date.

Meanwhile, directional ripping continues to be reimagined with the return of Armada's acclaimed all mountain ski family, the Invictus Series. Incorporating AR Nose Rocker, metal laminate and carbon/kevlar construction elements; the Invictus Series is built with two things in mind: power and speed. A variety of waist widths, including two new widths for 16/17, mean this series has the perfect tool for any terrain or ability.

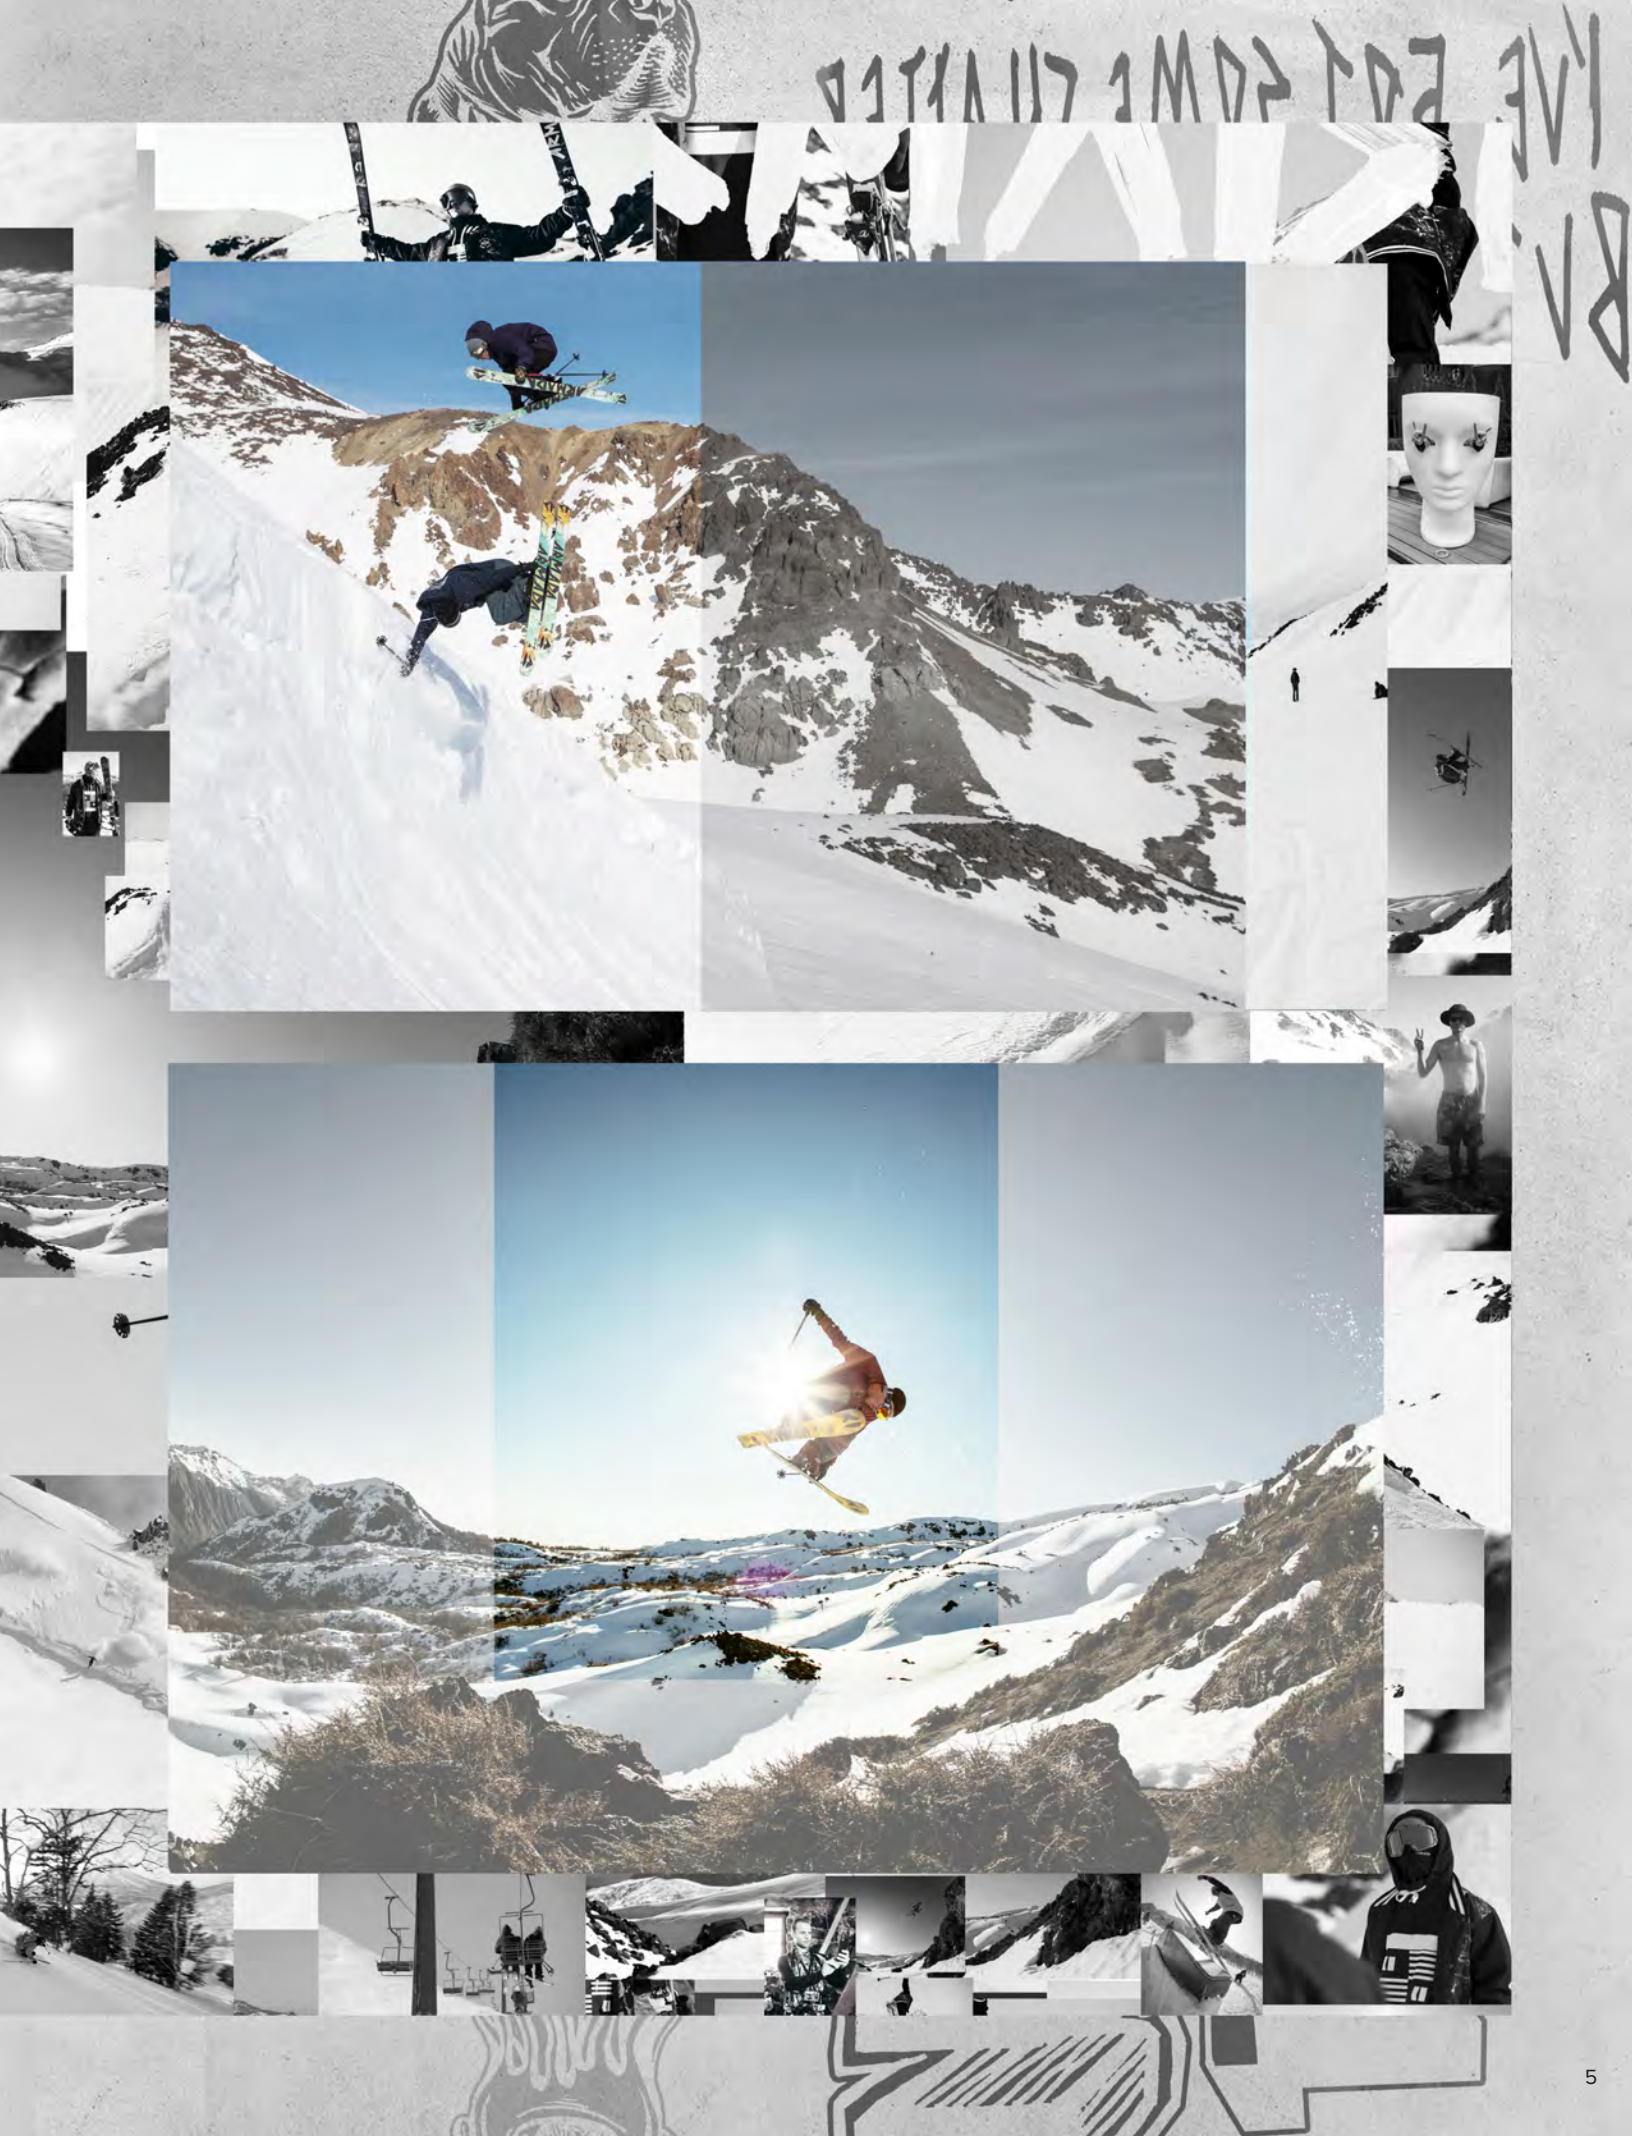

Complemented by our powder, touring, park and youth collections, Armada's 16/17 line is deep and diverse. Get familiar with Armada 16/17.

**ARMADA**

# ARV series

*the do everything ski since 02*

*Fourteen years of dominating the entire mountain. Since Day 1, the ARV has stood as a testament to what a true all-terrain ski should be. Powerful and maneuverable, stable and responsive, the all-new ARV series continues the legacy.*

# CAMBER PROFILES

## EST FREERIDE ROCKER

Rocker tip and tail combined with positive camber underfoot, to provide floatation in soft snow and create remarkable edge on the harder stuff.

## EST ALL MTN ROCKER

Entry rocker with positive camber under foot with no tail rocker. Floats in soft snow while making sure the ski stays on rails.

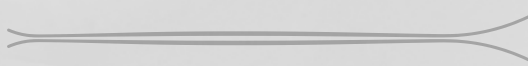

## AR FREESTYLE ROCKER

Rocker tips and tails are combined with positive camber under foot to allow the ski to charge with ease through unpredictable snow and maintain a solid carve when asked to do so. Turn the whole mountain into your playground.

## AR NOSE ROCKER

Traditional sidecut profile with tip rocker – for all mountain ripping.

## POSITIVE CAMBER

Traditional positive camber engages the tip and tail of the ski, enhancing ease of entry in, and exit out, of the turn, while maintaining solid edge hold.

# CORE PROFILES

## POP-LITE CORE

Lightweight wood is combined with a higher density, stiffer species in a horizontal laminate to create an impossibly lively ski that has all the power needed for boosting to new elevations

## POWER-LITE CORE

Stability, power and control are paramount in this 100% woodcore enhanced with hardwood stringers. For those looking for the ultimate in smoothness comes the Power-lite Core.

## TOUR ULTRA-LIGHT CORE

Our lightest wood species create the best up-hill feel while retaining the power and dampness required to descend the gnarliest of terrain. This core makes no concessions in performance in it's quest to be ultra-light

## HYBRID ULTRALIGHT CORE

A combination of lightweight woods throughout and hardwood laminates underfoot, the Hybrid Ultra-lite Core created the ultimate in agility and maneuverability without sacrificing any security or dampness underfoot

## INJECTZONE CORE

Consistency is king with this composite injection core, guaranteeing every ski is identical to the next with feel and performance.

# TECH FEATURES

1.7

1.7 Impact Edge - light, strong, heat treated for durability

2.2

2.2 Impact Edge - heat treated, built to avoid excess weight while maintaining durability

2.5

2.5 Impact Edge - oversized and specially heat-treated, built to resist impact damage

Comp Base - Armada's fastest base

50/50 - a blend of speed and durability, the base for the skier who wants it all

S7 Base - durable and low maintenance, with a speed additive for quickness

Ti - two layers of metal provides stability at the highest of speeds

Laminate Matrix - directional layering of fiberglass dictates flex pattern and torsional rigidity

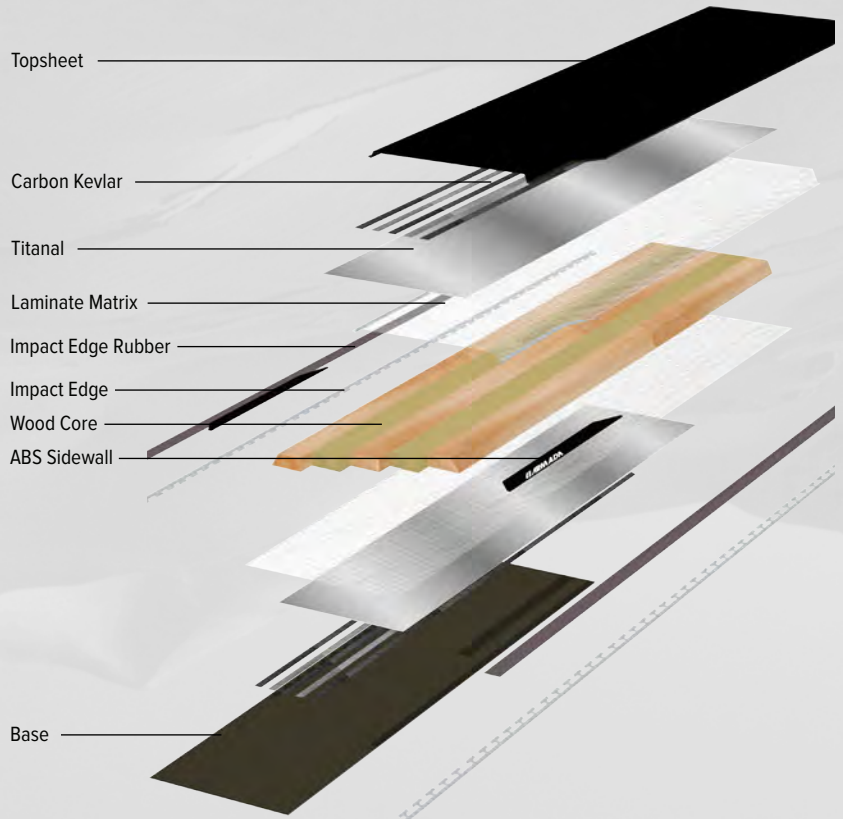

Carbon Kevlar Struts - Carbon and Kevlar stringers used in the tip and/or tail to add pop and extend life

Step Drill Bit System - The custom drill bit increases screw retention in Armada's skis

# SKI CONSTRUCTION

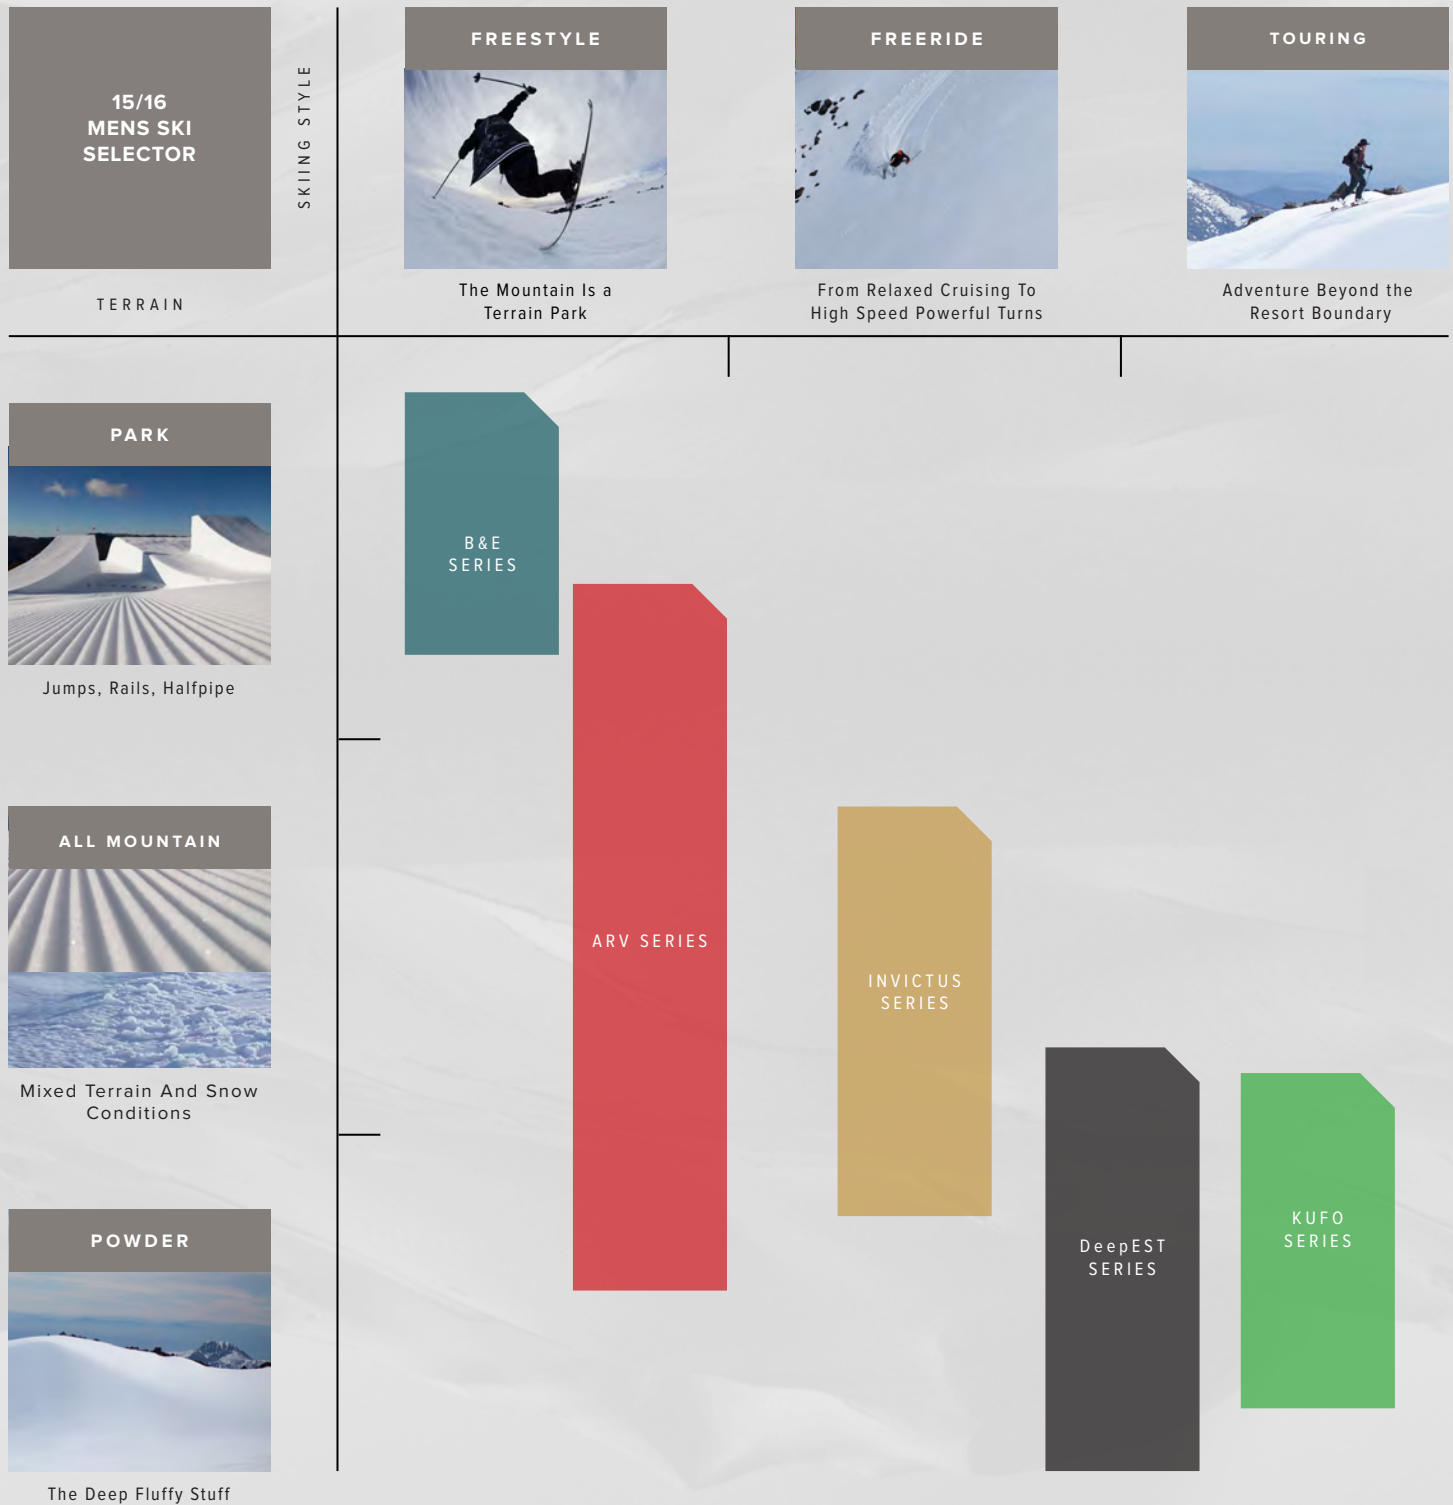

# SKI SELECTOR

At Armada, we recognize that everyone skis differently. While some people view the entire mountain as a terrain park others prefer to make powerful, high-speed turns. And for those that choose to take these styles beyond the resort boundaries we have the best products.

Start by choosing the skiing style that best matches your approach to the mountain. Next, select the terrain you ride. Use these responses in our ski-selector to find the industry's leading product, fit to you.

# KUFO SERIES

---

Exist beyond the boundaries with the KUFO Series. Unyielding in uphill execution and uncompromising in downhill performance, the 16/17 KUFO Series makes you efficient on the way up to let you rip on the way down. Keep up or *f#ck* off.

# DECLIVITY

9020013001

# KUFO 108

9020024001

KUFO SERIES

Everything you need in a touring ski, with no compromises in its alpine performance: the Declivity is designed for technical terrain in high mountains. The Tour Ultra-Lite Core keeps this ski light on the way up, while dual layers of titanal and AR Nose Rocker provide performance on the trip down.

You got to get up to get down - do both with this ski. With tip AR Nose Rocker that floats, a wider waist that's stable, a Tour Ultra-Lite Core that is light, and a flat tail for all skin attachments, this is the ideal touring ski for backcountry charging. Built for aggressive turns, this is the bigger, burlier incarnation of the KUFO 103.

# KUFO 103

9020023046

KUFO SERIES

Get beyond the ropes and explore new boundaries in the backcountry. The most lively of Armada's KUFO Series, the KUFO 103 is lightweight and built for quick descents. The new and improved Tour Ultra-Lite Core delivers a 16% weight reduction, while the EST All Mountain Rocker cuts through the crud. Tell your friends, Keep Up...

# DEEPEST SERIES

---

For the days ski movies are made of, Armada's DeepEST collection represents the most complete powder skiing collection on the market. Effortless flotation and fun turns are complemented by superior control on steep terrain to provide everything you need to enjoy the super deep days. *\*wife's permission not included*

# MAGIC J

9020025006

# JJ 2.0

9020020008

DEEPEST SERIES

As Tanner Hall's skiing progressed from the parks to the deep powder, trees and pillows of Retallack, he needed a tool that could handle the job. Enter the Magic J; our widest ski, for the ultimate in flotation and agility in the DeepEST of conditions. Patented.

The tool that changed powder skiing forever is back with the width and EST Freeride Rocker you need for deep days and the grip you need for edging on hard snow. This game-changer lives up to its legacy as one of skiing's biggest ever technological leaps. Patented.

# TST

9020029028

DEEPEST SERIES

For the big mountain skier in attack mode, this ski helps you charge any line with speed and confidence, even when the conditions are less than perfect. EST All Mountain Rocker keeps you charging through the crud and floating in the powder, while maintaining power and stability through the tail. Patented.

The most versatile ski in the Armada lineup. From chasing fresh tracks in the trees to ripping groomers, the TST is ready for whatever conditions Mother Nature throws your way. Tip rocker combined with a traditional tail means the TST floats when you want, but answers with power and stability when you ask for it. Patented.

New!

9020019006

# INVICTUS 89 TI

9020017009

INVICTUS SERIES

New to the Invictus Series, the 99 Ti shares the same commitment to power and performance of its big brother, the 108 Ti, but in a more versatile package. Wide enough for bigger terrain, with tip rocker and a traditional sidecut for all-mountain ripping, this ski is master of any domain.

Keep your turns locked on hard snow with this ski's carbon fiber and Ti build. Fearless in variable conditions with AR Nose Rocker, and durable thanks to AR50 Sidewall construction, here's your hard snow machine that's not afraid to venture off the groomers.

9020005001

ARV SERIES

Equally comfortable around the mountain or in the park, the ARV 96's waist straddles both worlds, without making sacrifices in either. AR Freestyle Rocker and Carbon Kevlar Struts keeps the ski ready for whatever the mountain throws at you. Bred from 14 years of award-winning performance, the ARV 96 is for the guy who wants it all.

The narrowest of the 16/17 ARV line, the 86 carries more than a decade of Armada's blood, sweat, tears and all-mountain freestyle heritage into this latest update of the iconic do-everything ski. A more centered mount gives this model greater versatility, whether riding forwards or backwards – leaving you to turn anything inbounds into your own terrain park.

# B&E SERIES

Some skiers look for the right line, some find it, and some say screw it and make their own. For the latter, we have the B&E Series, designed to help its creators Henrik Harlaut and Phil Casabon realize the style that makes them today's most creative freestyle skiers.

# EDOLLO

9020014018

# BDOG New!

9020011018

Built to be as unique as its creator, Henrik Harlaut, the EDOLLO redefines freestyle performance. An innovative blend of carbon fiber and AR Nose Rocker enable you to butter, smear, press and gap your way from the streets to the park, and everywhere in between.

Phil Casabon's genre-bending style is changing the way we look at skiing. For his pro model, Phil wanted a ski that presses, nollies and pivots, allowing him to express his unsurpassed creativity – the result is the all-new, 99% softer BDOG pro model.

# VICTA SERIES

---

Brand new for 16/17, the Victa Series adds a directional, all-mountain complement to our women's offering. Stability, precision and versatility are the hallmarks of this collection, devoted to making aggressive turns wherever your skiing takes you.

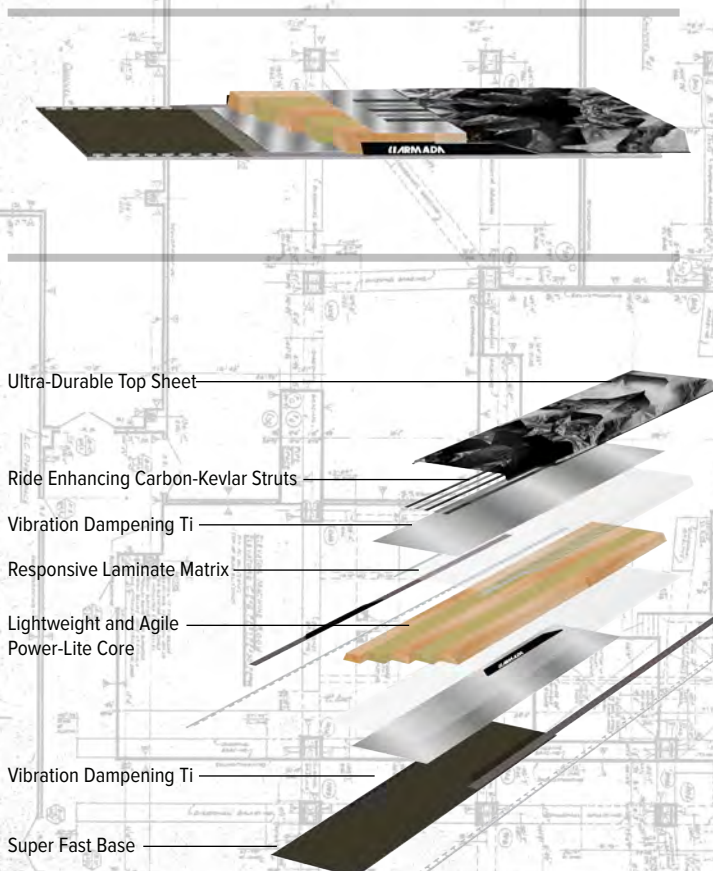

# VICTA 87 TI New!

9030032046

## VICTA CONSTRUCTION

Answering demand for a women-specific high-performance ski, the Victa 87 Ti allows you to attack the mountain with confidence. Carbon Kevlar Struts and AR Nose Rocker keep this ski lively, while aircraft grade Ti creates dampness that powers through all terrain.

LENGTH	TIP	WAIST	TAIL	RADIUS
155cm	127	85	117.5	16m
163cm	126	86	118.5	16.5m
171cm	129	87	119.5	17m

- FEATURES:**
- + AR Nose Rocker
  - + Power-lite Core
  - + AR50 Sidewall
  - + Comp Series Base
  - + Carbon Kevlar Strut
  - + Titanal
  - + 2.2 Impact Edge

# VICTA 93 New!

9030033046

Smooth and versatile, this ski delivers the performance to let you shred all day long. AR Nose Rocker gobbles up variable snow and crud while Carbon Kevlar Struts keep this ski lively and stable, ready to turn when you want it to.

VICTA SERIES

# ARW SERIES

---

New for 16/17, the ARW collection is the ultimate toolkit for those who see the entire mountain as their playground. Power, maneuverability and stability come together in this series that lets you explore the mountain in a new, creative way.

# ARW 96

New!

9030009008

# ARW 86

New!

9030008036

An all-day, everyday ski designed to turn the entire mountain into a playground. Whether shredding pow in the trees or carving groomers under the lift, Spin Tip keeps the ski light and agile, while Carbon Kevlar Struts in the tip and tail keep it stable and smooth.

The ARW 86 carries a decade of Armada's blood, sweat, tears and all-mountain freestyle heritage into this latest update of the original women's all-mountain freestyle ski. Lightweight construction and AR Freestyle Rocker help you easily handle everything from groomers, to park, to frontside terrain.

ARW SERIES

# YOUTH SERIES

Here is where it all starts; the gateway to a lifetime of big turns, faceshots and all-mountain exploration. Once they're hooked, remember you only have yourself to blame.

# TRIPLE J

9060028006

# TANTRUM

9060027028

YOUTH SERIES

With a design identical to the JJ, packaged for little rippers, the Triple J is the most versatile youth powder ski on the market. Rockered tip and tail provide floatation in soft snow while positive camber underfoot gives remarkable edge control on harder conditions. Patented.

LENGTH	TIP	CONTACT POINT	WAIST	CONTACT POINT	TAIL	RADIUS	WEIGHT

# ARW 84

9060007036

YOUTH SERIES

Finally an excuse to go outside the lines and make the entire mountain your playground. A Pop-Lite Wood Core and Impact Edge ensure this ski will perform in any condition. Bomb groomers, spin off cat tracks and find transitions on every trail – it's all accessible on this ski.

Trade the sugar and spice for a Pop-Lite Wood Core and positive camber in this all-mountain ski that will turn any girl into a park-ripping, all-mountain shredder. Durable and lively, this is the ski for whatever challenge she wants to take on next.

# BANTAM

9040010001

# KIRTI

9050022036

YOUTH SERIES

A tight turn radius and solid construction make the Bantam the perfect ski for the mountain's youngest skiers. Durable and user-friendly, the Bantam will help your little one fall in love with skiing – start grooming your shred-buddy!

This is how it starts: with a short turn radius, awesome graphics and a turned-up tail, your little angel is on her way to becoming an all-out shredder. Enjoy it now, because she'll be leaving you behind in no time.
