

2016-2017
BINDINGS COLLECTION

LOOK

CONNECTED TO THE MOST PIVOTAL MOMENTS IN SKIING

LOOK, the ski binding specialist based in Nevers, France, is one of the largest manufacturers of high-performance bindings in the world. Since 1947, LOOK has developed leading innovations in binding technology in collaboration with the world's best athletes, delivering the industry's most effective combination of power, retention, and release. Integral to the success of competitive racing, freeride, and freestyle champions for over 60 years and winner of 17 medals at the 2014 Sochi Olympic Games, LOOK continues to be connected to the most pivotal moments in skiing.

OR THE SAFETY YOU WANT TWO PIVOT POINTS

THE LOOK ADVANTAGE

The essential connection between a skier and their skis. LOOK bindings supply **best-in-class power, precision, and protection**, guaranteeing the **trustworthy reliability and technical performance** desired by every skier, and consistently demanded by the world's best.

- ✓ **POWER**
- ✓ **PRECISION**
- ✓ **PROTECTION**
- ✓ **RELIABILITY**

COUPLING STRENGTH = POWER

Best-in-class coupling strength results in the most effective power transmission in skiing. LOOK's wide screw pattern, low stack height, one-piece frame mounted design, and boot-to-binding roll coupling instantly transmits energy and movement into the ski for ultra-reactive performance and control.

NATURAL STANCE = PRECISION

The most neutral and consistent ramp angle (0° to 1°) results in a stronger, more balanced skiing position and increased precision on modern ski designs. LOOK is the only binding brand to develop a consistent stance for both Alpine and WTR due to our proprietary Dual Standard Concept.

180° TOE RELEASE = PROTECTION

The most consistent, reliable release in all directions results in the confident protection to let you out when you need. LOOK is the only binding brand to develop a true mechanical upward release that functions independently from the heel for the most effective multi-directional protection on the market.

ELASTIC TRAVEL = RELIABILITY

More elastic travel results in more reliable retention to keep you in when you need. LOOK bindings boast the most lateral travel before release and the fastest re-centering, delivering superior shock absorption and reducing unwanted pre-release.

FULL ACTION TOE and DUAL STANDARD CONCEPT

THE NEXT-GENERATION IN PROTECTION AND PERFORMANCE

Strategically reinforced housing enhances durability

14% longer toe-wings provide stronger boot to binding coupling, maximum power transmission

10% wider platform for more efficient power transmission, enhanced steering, and control

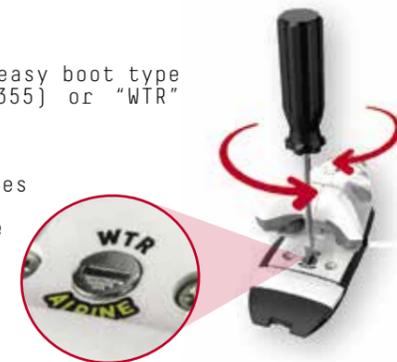

Increased toe ramp increases leverage and drives energy

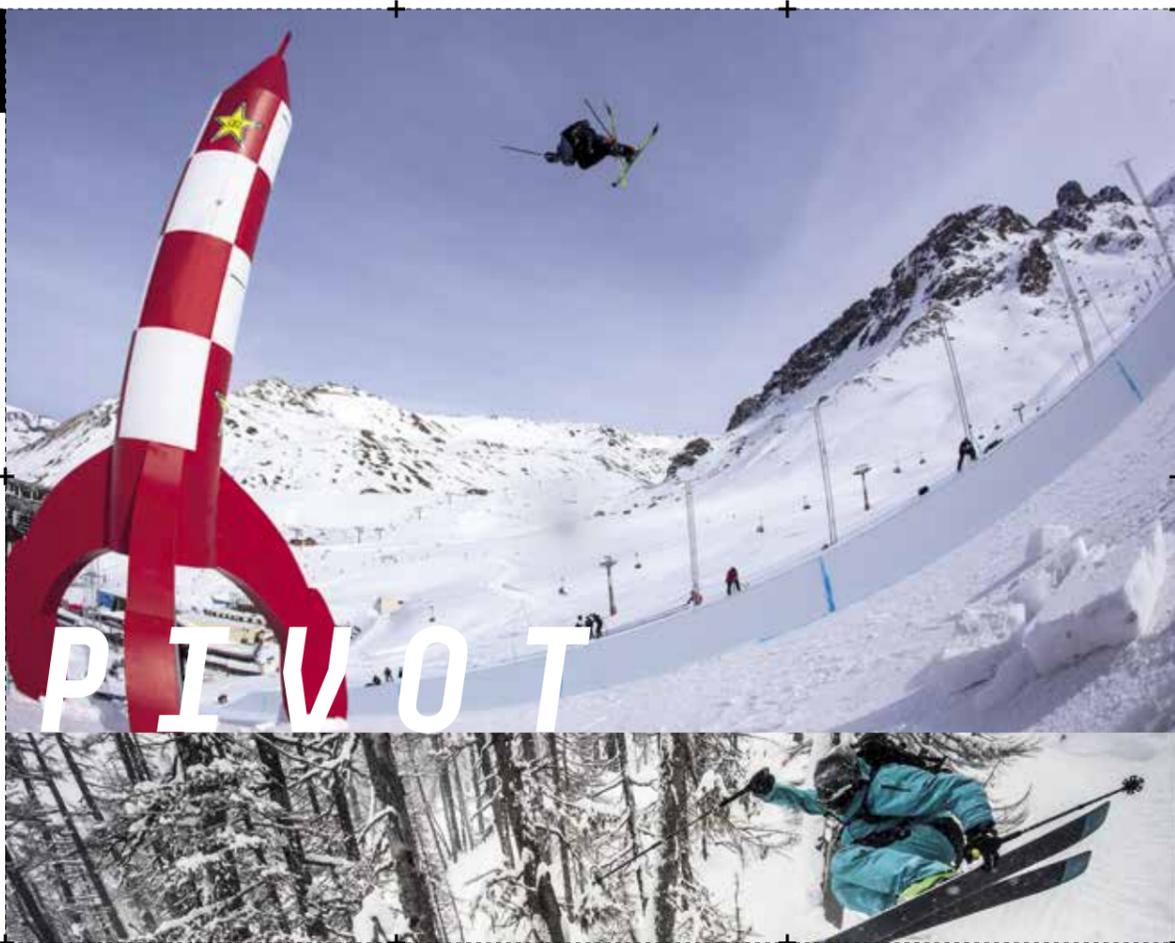

DUAL WTR

The industry's first alpine bindings to offer quick, easy boot type selection for use with traditional Alpine (ISO 5355) or "WTR" Rocker Soles (ISO 9523).

- Quick, easily visible adjustment between boot types
- Proprietary design retains consistent ramp angle between standards
- Available on PIVOT, SPX, and NX bindings

Consistently demanded by the world's best, the iconic LOOK PIVOT is the most trusted and reliable binding in skiing. LOOK's proprietary turntable design delivers maximum power transmission, shock absorption and the longest elastic travel on the market, providing the industry's most trustworthy retention and release, and making the PIVOT the essential component for today's most committed skiers.

Short Mounting Zone

The shortest mounting zone of any alpine binding available provides less swing weight, improved response, and a deeper, rounder, more consistent ski flex.

7 Points of Contact

More points-of-contact with the boot results in increased lateral energy transmission, drives more power to the edge of the ski and provides superior control, response, and snow feel.

Turntable Heel

LOOK's unique turntable design rotates directly under the tibia and provides 28mm of elastic travel to deliver unmatched shock absorption for significant reduction of pre-release.

Henrik Harlaut

The evolution of LOOK's award-winning binding design, the LOOK SPX is the most performance-oriented, user-friendly Dual Standard binding on the market. The recently redesigned Full Action toe drives more power into the ski while enhancing steering and control. Combined with LOOK's oversized heel pivot design, the toe and heel systematically deliver best-in-class coupling strength and protection, positioning SPX as the premium component for the widest range of skiers.

Elastic Travel

27mm of elastic travel delivers best-in-class shock absorption for confident retention and a significant reduction in unwanted pre-release.

Oversize Heel Pivot

The oversize heel pivot delivers increased coupling strength (boot-binding interface) for more efficient and powerful energy transmission to the edge of the ski.

Dual Standard Concept

Compatible with traditional Alpine (ISO 5355) or "WTR" Rocker Soles (ISO 9523).

NX

Now featuring LOOK's Dual Standard Concept, the LOOK NX is the lightest weight, most user-friendly, and most versatile alpine ski binding. The recently redesigned Full Action toe drives more power into the ski while enhancing steering and control. Combined with the easy step-in, step-out heelpiece design, the NX delivers the perfect blend of protection and performance in a lighter weight, user-friendly package for all skier levels.

Easy Step-In/Step-Out

Wider heel throw offers easy and intuitive entry-and-exit.

Lightweight

*PER 1/2 PAIR

Increased ease-of-use and maneuverability with less fatigue.

Dual Standard Concept

Compatible with traditional Alpine (ISO 5355) or "WTR" Rocker Soles (ISO 9523).

COLLECTION 2016-2017

RACE

Designed for use on R21 WC and R21 Racing plates, LOOK's ROCKERFLEX WC technology features a smaller mounting zone and partially suspended heelpiece, neutralizing pressure between toe and heel to provide consistent, natural ski flex, enhanced control, and optimum precision for elite-level racing performance.
