INNOVATION WITH PURPOSE

revo

FOUNDED IN 1985,

REVO QUICKLY BECAME A GLOBAL PERFORMANCE EYEWEAR BRAND KNOWN AS THE LEADER IN POLARIZED LENS TECHNOLOGY.

---

REVO SUNGLASSES WERE FIRST CREATED BY UTILIZING **LENS TECHNOLOGY DEVELOPED BY NASA** AS SOLAR PROTECTION FOR SATELLITES.

---

NEARLY THREE DECADES LATER, **REVO CONTINUES TO BUILD ON ITS RICH TRADITION OF TECHNOLOGY AND INNOVATION BY OFFERING THE CLEAREST AND MOST ADVANCED HIGH-CONTRAST POLARIZED SUNGLASS AVAILABLE.**

## LENS TECHNOLOGY

### REVO LIGHT MANAGEMENT SYSTEM™ (LMS):

- Revo lenses manage the full spectrum of light - blocking out the bad and allowing in the good
- All Revo lenses are polarized
- Revo lenses selectively manage and filter all light in the color spectrum, with emphasis on Blue light/HEV light

### LENS MATERIALS:

- **SERILIUM™ LENSES** - An exclusive lightweight, shatterproof lens formulated of polycarbonate
- **CRYSTAL LENSES** - A higher form of Crown Glass, Revo Crystal lenses are scratch-resistant and are ground and polished to about the same standard as a camera lens

## REVO WARRANTY

For complete warranty information, please visit [revo.com/warranty](http://revo.com/warranty).

### REVO SURFACEPRO™ PROTECTION SYSTEM:

- **REVO EXCLUSIVE MIRROR COATINGS** High-tech, performance mirror coatings based on the NASA technology used on space camera lens coatings, telescopes, satellite protection and space walks
- **REVO BACK SURFACE PROTECTION** Combination of protective filters and coatings that help reduce intrusive back surface reflections
- **AUTHENTIC REVO OLEOPHOBIC COATING** A permanent coating that repels virtually anything - water, oil, sweat, dirt, dust, ink or even a fingerprint
- **REVO SUB SURFACE PROTECTION** Surface scratches can let UV rays sink through the lens and harm the eyes - Revo mirror coatings prevent these UV rays from seeping through to the eye
- **REVO AXIS PRO PROTECTION** Through a proprietary molding process, Revo achieves optimal glare management with accurate positioning of the polarizing filter, achieving 99% polarization efficiency
- **REVO SMART LENS GEOMETRY** Lens are optically centered and precisely positioned to prevent eye fatigue caused by shifting images within deep base curves and wrap frames

BUY VISION  
GIVE SIGHT

WHEN YOU BUY REVO  
TEN DOLLARS  
GOES TO SUPPORT  
THOSE FIGHTING FOR  
THEIR SIGHT.

Brien Holden Vision Institute

REVO

THE BRIEN HOLDEN VISION INSTITUTE IS AN AUSTRALIAN BASED NONPROFIT NON-GOVERNMENTAL ORGANIZATION WITH AN INTERNATIONAL FOCUS ON EYE CARE RESEARCH AND VISION CARE DELIVERY. FORMERLY THE INSTITUTE FOR EYE RESEARCH, IN 2010 IT WAS RENAMED IN RECOGNITION OF CO-FOUNDER BRIEN HOLDEN, A 1997 RECIPIENT OF THE MEDAL OF THE ORDER OF AUSTRALIA FOR HIS CONTRIBUTIONS TO EYE CARE RESEARCH.

## MISSION STATEMENT

'We believe that sight is a fundamental right for everyone, Everywhere. Our mission is to develop new solutions for vision care and eliminate vision impairment and avoidable blindness, thereby reducing poverty and suffering. We recognize the importance of building local and sustainable systems of eye care in collaboration with national health systems and meeting local community needs, allowing us to work alongside existing infrastructure to establish and/or improve delivery of eye care. We place a deep emphasis on community control in our partnerships at the local level to achieve affordable and quality eye care. To that end it undertakes research, offers postgraduate eye research opportunities to students, supports new technologies and helps deliver sustainable eye care throughout the world.'

THE INSTITUTE'S MISSION IS THE WORLDWIDE ERADICATION OF PREVENTABLE BLINDNESS AND VISION IMPAIRMENT, INCLUDING PEOPLE IN UNDESERVED COMMUNITIES.

# revo

## OUR MISSION

TOGETHER, REVO, BONO AND  
THE BRIEN HOLDEN VISION  
INSTITUTE ARE COMMITTED TO  
PREVENTING VISION IMPAIRMENT  
AND BLINDNESS IN MORE THAN  
5 MILLION CHILDREN AND  
ADULTS BY 2020

---

WHEN YOU BUY REVO  
SUNGLASSES, REVO DONATES  
\$10 TO HELP THOSE  
FIGHTING FOR THEIR SIGHT.

RE 1036 09	Matte White	Blue Water   Solar Orange

A woman with long blonde hair, wearing a black bikini top and sunglasses, is the central focus. She is looking towards the camera with a slight smile. The background is a bright, sunny outdoor setting, likely a boat. To her left, a green boat is visible, with a window that has a small portrait of a woman on it. The overall atmosphere is warm and summery.

# JIMMY CHIN

Revo Ambassador, Professional Climber, Photographer, Filmmaker

Jimmy lives a life of art and adventure, combining a career as a commercial photographer, National Geographic photographer, documentary filmmaker and a 14 year veteran of The North Face Athlete Team. He is one of the most sought-after and recognized adventure sports photographers and filmmakers working today.

In the past decade, Jimmy has collaborated with, filmed and photographed some of the world's most progressive athletes and explorers while participating in break through expeditions around the planet. He has climbed notable first ascents in the Karakoram, traversed the Chang Tang Plateau in Tibet on foot and skied first descents in the Himalayas. He is one of the only people to ski Mount Everest from the summit and climbed the much coveted first ascent of the Shark's Fin on Meru.

Jimmy splits his time between New York City and Jackson Hole, Wyoming with his co- director and wife, Chai Vasarhelyi, and their daughter Marina.

JIMMY CHIN WELCOME CARD

# BLUE WATER LENS

Perfect for cutting glare in bright conditions on the water. Provides maximum glare protection and visible clarity with the classic heritage of our blue mirror coating.

Contrast-enhancing filters amplify the sweet spot of the visible light spectrum.

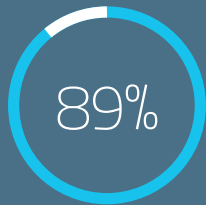

Our Blue Water lens produces a soothing tint while spectral sensitive filters highlight the critical green, red and yellow portions of the spectrum without altering natural colors.

100%

# GREEN WATER LENS

Revo Green Water Lens enables natural colors to pop and radiate by completely cutting through surface glare in medium and low light conditions. Perfect for fishing on lakes and streams, hiking, golf, and trail and mountain biking.

Our green multilayer mirror, combined with the Terra base lens, creates clarity by accentuating the middle of the spectrum (green) for an enhanced visual experience.

# TERRA LENS

Designed for on or off trail activity, our lens actively filters the light spectrum to provide clear vision from trailhead to viewpoint.

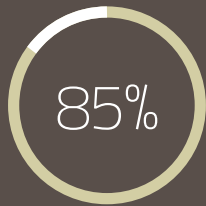

Excelling in variable light conditions through a scientific formulation of tint filters, our Terra Lens amplifies the experience of all outdoor activities from hiking and trail running, to climbing and camping.

The luminous transmission highlights the yellow, orange and red bandwidths of the color spectrum to enhance visual clarity.

# OPEN ROAD LENS

Provides the ultimate in protection and visibility for driving, cycling, golf, running and everyday active lifestyles.

Image intensifier filters improve light adaptation whether in bright or low light situations while also precision tuning light transmission for greater sharpness, crispness and contrast.

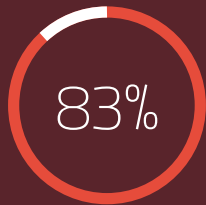

Formulated with a proprietary rose-amber-vermillion blended tint for moderate light transmission and clear visibility during shifting conditions.

# STEALTH LENS

Revo has reintroduced one of the classic mirror coatings in sunglass heritage: Stealth. Not just another silver mirror but a true technological achievement and the backbone of Revo Light Management.

The Stealth lens reduces internal reflection and provides even management of light across the entire visible light spectrum to create an unmatched visual experience for the wearer.

# SOLAR ORANGE LENS

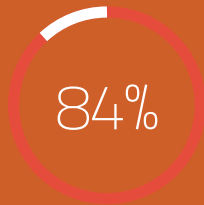

A high-intensity, iridescent and visually stunning multilayer mirror coating, the Solar Orange lens enhances surrounding terrain by highlighting the upper end of mid-range light. The reintroduction of the Solar Orange mirror is an iconic and high tech achievement.

Green, yellow and red colors come to life with a glowing effect while 84% of visual light is blocked and low level blue light is managed. The Solar Orange lens is perfect for all outdoor sports.

# CHAMPAGNE LENS

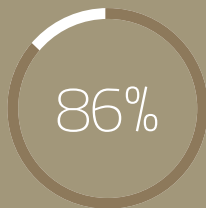

Continuing in Revo's heritage of light management through distinctive lenses, the Champagne lens is a subtle pearlescent color that is appealing to the eye while delivering a soothing visual performance with a spectacular incandescent effect.

The champagne lens allows in just 14% of light and balances it across the entire visual spectrum for great overall performance in bright conditions. A smart choice for the ultimate lifestyle lens.

I N N O V A T I O N W I T H P U R P O S E

## — INTRODUCING THE REVO GOGGLE —

THE RICH HERITAGE OF HIGH-CONTRAST, COLOR-ENHANCING LENSES AND THE INNOVATIVE STYLING YOU EXPECT FROM REVO - NOW IN A GOGGLE.

REVO HAS A LONG AND STORIED **HISTORY OF INNOVATION AND TECHNOLOGY IN SKI GOGGLES**. HAVING DEBUTED ONE OF THE **first fixed single lens shields** coupled with a long association with the US Ski Team and winter sport enthusiasts, **THE REVO GOGGLE COLLECTION WAS A NATURAL** NEXT STEP IN THE BRAND'S EVOLUTION.

Designed to bring the Revo heritage lens technology to the slopes, **THE GOGGLE COLLECTION** combines signature Revo mirrors, unique frame and strap design and a revolutionary dual lens combination OF **PHOTOCHROMATIC POLARIZED PROTECTION AND PERFORMANCE**.

**AIR-VENT TECHNOLOGY** – for optimal air flow inside and out, our air-vent technology reduces fogging

**REVOLUTION RX READY** – Ability to add custom REVolution Rx to any goggle

**ADJUSTABLE, STYLISH STRAP** – constructed with anti-slip silicone beads to stay put

**UNRIVALED PERIPHERAL VISION** – for an optimal field of vision on the slopes

**TRIPLE LAYER FOAM PROTECTION** – a secure, comfortable fit for flexibility that doesn't sacrifice function

**COMPATIBLE WITH A RANGE OF HELMETS AND CUSTOM-ENGINEERED WITH FOAM CUT-OUTS TO ACCOMMODATE EYEGLASS WEARERS**

## THE REVO LIGHT MANAGEMENT SYSTEM™ (LMS) – THE ULTIMATE VISUAL EXPERIENCE

The signature Revo experience is achieved by managing the full spectrum of light and offering superior protection from UV rays and Blue light/HEV (High Energy Visible) light. The Revo Goggle Collection incorporates LMS technology for outstanding visual acuity and performance in all outdoor conditions. Selective color filtration delivers the right light at the right time on the slopes for sharp, vivid image recognition and superior contrast.

## THE REVO ICE MASTER™ LENS FEATURES A POLARIZED PHOTOCROMATIC LIGHT MANAGEMENT™ (PPLM) SYSTEM

Revo debuts a new photochromatic goggle lens that allows in 68% of the available light in its unactivated state and then darkens to block 88% of light in its activated state. The Revo Ice Master™ lens makes automatic adjustments for every light condition encountered on the mountain.

- Featuring Digital Polarized Plus™ technology -blocks the glare but allows full terrain recognition and does not hinder viewing of gauges, watches, devices, etc.
- VLT - 32% unactivated, 12% activated
- Class 1 to Class 3 filter categories
- Temperature stability - will not vary in performance due to low temperature
- Fast changing, contrast color that adjusts to every light condition. The Revo Goggle features an orange-brown base lens color that darkens to brown when fully activated.
- Excellent glare reduction while blocking 100% of UVA, UVB, UVC, and HEV light

**THE REVO ICE MASTER™ GOGGLE MIRROR COLORS**

---

Revo heritage mirror coatings Blue Water and Green Water, and the newly introduced Solar Orange, deliver the famous Revo experience – outstanding protection, color enhancement, light management and innovative style.

**BLUE WATER**

---

Signature multilayer technology reflects and enhances lens performance without diminishing contrast or color distortion and reduces internal light reflections, providing sharp, clear vision.

**GREEN WATER**

---

Utilizing our classic multilayer technology, Revo's hypnotic green mirror assists in improving vision in low light conditions while enhancing contrast and controlling internal reflections.

**ORANGE SOLAR**

---

High intensity, visually stunning multilayer mirror that assists in blocking potentially harmful rays and highlights the terrain and surrounding areas to deliver a distinctive visual experience.
