# ski culture ad libitum

## A ski brand forged in an uncompromised spirit and aesthetic.

### A non-conformist spirit

Black crows is above all a story of friendship, that of evolving freeride skiers in Chamonix, **Camille Jaccoux** and **Bruno Compagnet**. Two personalities from the free skiing universe, both passionate about mountains and adventure. This passion was translated by their willingness to find skis adapted to their practice in the Mont-Blanc massif. Unsatisfied by the skis proposed on the market and thanks to the encounter of the industrialist **Christophe Villemin**, they decided to make their own ski. That's how black crows started, with the very first ski, the corvus, which went on sale in 2007. The collection now embraces all the free ski domains, from ski-touring to freeride, passing by the piste and a special feminine range. Parallel to this development, black crows offer numerous accessories: poles, skins, ski-bags and back packs.

For two years, the brand has also ventured in to the production of highly technical textiles with two complete collections aimed at ski-touring and freeride. It is therefore now possible to be equipped from head to to foot by black crows, except for footwear, pants and bras, but who knows what the future will hold for us.

### Avant-garde aesthetic

Inspired by modern art, passing via urban culture, the black crows identity is expressed with a modern and exclusive design. Firstly the logo, created by **Yorgo Tloupas** of **Yorgo&Co**, is an association of chevrons which remind us of our childhood drawings and symbolises the squadron of crows.

Simple and geometric, it can be modified into infinity, creating a perspective close to illusion, within the line of optical art. Like this, black crows skis are recognisable to everybody. The involvement of Yorgo&Co's Paris design office and more particularly of its founder, Yorgo Tloupas, in the artistic direction of the brand, manifested the link between urban and skiing universes. This relationship is equally one of the foundations of the company, of having the willingness to surpass classic boundaries between the mountains and the town with a new approach to the mountains. With the clothing collections, the participation of young well known international designers is witness of this desire to associate technicality with open and unusual aestheticism.

### Cardinal virtues

Black crows have always associated themselves with the largest manufacturers to design products which are robust and technically irreproachable. Whether it be skis manufactured with the **Elan**, **Amer** and **Blizzard** factories, or textiles made in partnership with **GORE-TEX®** and **Polartec®**, the detail of quality is the pillar of the brand.

### The art of the descent

Conceived originally exclusively for downhill, the arrival of a freebird range aimed at ski-touring and therefore for the ascent has not meant a departure from the multiple requirements of daily use. All our products must be efficient on the descent, whatever the terrain and the conditions which they confront.

# color is back

---

## From the distension comes the metamorphosis.

For this fourteenth collection, **black crows** and the **Yorgo&Co** design studio explore the chevron's line with a celebrated ingredient: **colour**.

The chevron, itself an angular line, has been redesigned, rethought and eventually stretched. This elongation of the extremities of the chevron creates a flight line which runs along the entire length of the ski. This new collection holds this guideline, but regains colour after a black and white traverse.

To refine the segmentation and improve the visual equilibrium of the pattern, the thickness of the lines have been slightly modified. A subtle change that your senses will undoubtedly notice. The three ranges remain associated with the lines thickness, from the widest (big mountain) to the narrowest (resort) passing by an intermediary thickness (all mountain). As for the women's collection (birdie), it is distinguishable by the tones, the thickness of which remain consistent to each range.

The resort range also experiment a radical change with two new models adorning a sophisticated monochromatic dress.

A very modern and impertinent ensemble that shall enlighten the piste. In the freebird constellation, monochromatics are steady with their slight touch of optical illusion due to black crows' specific top-sheet. The chevrons absorb more or less light to give the impression that they are really in relief.

It's just like in the movies.

# freeski quartet

## When magic goes along with science.

Our vision of free skiing is built around 4 categories: **resort**, **big mountain**, **all-terrain** and **touring**. This guideline guides our vision of skiing and imposes upon us our range of 4 criterias: all terrain, all snow conditions, easefulness and efficiency. This is why, to reach this objective, we test our skis daily in the heart of the mountain massifs around Chamonix. That is where the authenticity of black crows is forged.

On the gourmet menu of 2020-2021, attention is focussed on the resort range with two new outstanding skis, the **rivus** and the **sora**, while the ultra exclusive **arto** emerge from oblivion. It's a new era for the resort range which steps up with ultra specific graphics for super technical models.

In the all terrain range, a new all terrain ski aimed at the wilder adventures attracts the spotlights, the **justis**. A ski for those evolving in the ski areas who want a ski which can safely take them further away.

In the big mountain range, the **anima** enjoyed a rejuvenating treatment to improve its performance on hard ground and at low speed. A modernization that gave way to the birth of its female counterpart in the birdie range.

In the freebird range, a breath of modernity has enriched the **corvus freebird** and **orb freebird** models. The raison d'être being invariably the perfect balance between lightness and skiability.

And for kids, three new models aimed to catalyse youthful energy come to existence. Jungle fever.

Concerning the ski poles, the **meta** takes a new dimension with a shaped grip rubber and a new 90mm basket which adapts to changes in the terrain.

All of this is marvellous. Bon appétit.

# slope range

More than ever, joy is never over.

“Too long abandoned in the affable and commercial, the piste, is for us, a synonym for wild turns, pulsations and resounding acceleration... While the air whips our faces thirsty for speed.”

**Camille Jaccoux**

### energetic metallic rapid

**description:**

A new beast for pistes with a technical and stylish sophistication, the **rivus** is a puncher which enjoys the many conditions encountered in resort. Wide intermediary, beautiful dynamic enhanced by the inclusion of titanal, the rivus is a very reactive ski which makes fast acceleration safer while remaining very easy to handle. Pure aesthetics for a ski with a radical performance.

**the nitty-gritty:**

**Intermediate waist:** 88mm underfoot.  
**Tip rocker:** good pivot and easy turn transition.  
**Long classic camber:** classic underfoot camber with wide ski/snow contact for cutting downhill turns.  
**Double titanal chevron-shape plate along the ski:** rebound and energy while keeping the weight as low as possible.  
**Energetic flex with great edge grip:** Performing but manoeuvrable.

**technical specifications:**

**Construction:** semi-cap  
**Core:** poplar wood core  
Chevron-shape double titanal plate  
**Weight:** 3550g/pair @174.3

### cutting precise agile

**description:**

A new ultra-performing player aimed at smooth surfaces, the **sora** has a silhouette and flex which calls for a piste party. Carving, gates, tight turns, the Sora has all that is necessary for transporting you with finesse and precision. The immaculate top of the range for gliding over all ski areas.

**the nitty-gritty:**

**Narrow waist:** 82mm (quick edge to edge).  
**Tip rocker:** good pivot and easy turn transition.  
**Long classic camber:** classic underfoot camber with wide ski/snow contact for cutting downhill turns.  
**Short radius (17m) and narrow waist (82mm):** reactive, edge to edge transition speed, short carving lines. Ski oriented towards 'piste' and changeable snow conditions, very stable with a fast edge to edge transition.  
**Dynamic flex with great edge grip:** performing but manoeuvrable.  
**Double titanal chevron-shape plate:** rebound and energy while keeping the weight as low as possible.

**technical specifications:**

**Construction:** semi-cap  
**Core:** poplar wood core  
Chevron-shape double titanal plate  
**Weight:** 3400g/pair @172.1

**ultra rapid**  
**ultra precise**  
**ultra exclusive**

**description:**

A 68mm waist technical and aggressive ski, perfect for the enthusiasts of meticulous curved lines. Its stiff flex offers grip and tonicity and a really good behavior on super hard snow. Its short radius for a giant slalom ski makes it pretty easy to ride. This iconic ski is perfectly usable in competition.

**the nitty-gritty:**

**Tight waist:** 68mm.  
**Rocker:** no rocker, flat tail.  
**Camber:** classic camber.  
**Short radius for a giant slalom ski, which makes it pretty easy:** 24m.  
**Sidecuts designed for giant slalom.**  
**Flex:** stiff with maximum grip and tonicity.  
**Double titanal plate reinforcement.**

**technical specifications :**

**Construction:** sandwich  
**Core:** beech, ash  
Double titanal plate  
**Weight:** 3800g/pair @183.0

**style code flat:** 101205

# all-terrain range

Wild, four letters, running through the veins,  
and out to the wilds.

“Black crows skis are for freeskiing all terrain. Since the first hour, Bruno and I have had the ambition of offering wide, averagely wide and narrow skis, but always with the same spirit: that is to play with the element on all slopes.”

**Camille Jaccoux**

**good handling  
accessible  
versatile**

**description:**  
This incomparable mid-fat all terrain ski is reputed for its tolerance and playfulness. The association of a very progressive flex and good lengthen side lines brings great maneuverability and strong hold at high speed. With a DNA derived from freestyle, the progressive and supple flex makes it easy to handle and adapted to progression; whereas its side lines give a very effective and stable edge. Creativity for everybody on all types of terrain.

**the nitty-gritty:**  
**Mid-fat waist:** 97 mm.  
**Double rocker:** maneuverability and great pivot.  
**Medium long side-cut:** 20m, stability at high speed, great balance between firmness and maneuverability.  
**Medium classic camber:** classic camber underfoot with moderate ski/snow contact, creating a good balance between stability and maneuverability.  
**Progressive flex:** comfortable and friendly.

**technical specifications:**  
**Construction:** semi-cap step down  
**Core:** poplar

tip: 13.7  
waist: 11.0  
tail: 12.7  
radius: 21

**surfy  
aggressive  
light**

#### description:

The **ferox** was born from the necessity of offering a bi-tip, double rocker, powder type touring ski which is still efficient on the edges. So, the objective is the powder and the sensation of floating on the snow. But the soul remains alpine to adapt to all conditions encountered while touring. Equipped with a tail tip and a double rocker, this is a ski which offers great sensations in powder with its planing and immediate pivot, but which still sits well on hard snow due to its progressive side-lines.

To optimise its weight (3600g for the 181 cm), the ferox was conceived on a 3D shape drawn in an H which cuts the upper part of the ski and lightens it without altering its solidity due to a carbon reinforcement which adopts this 3D shape. The core was also made lighter with a mix of paulownia, poplar and isocore (a polyurethane mousse strengthened with continuous glass fibre).

#### the nitty-gritty:

**Wide Width:** 110mm waist.  
**Double Rocker:** great pivot.  
**Medium classic camber:** classic camber underfoot with intermediate ski-snow contact : balances maneuverability with stability.  
**Long side-cut, 21 m turning radius:** stability at high speed.  
**Progressive Flex:** comfortable on every kind of terrain.

#### technical specifications:

**Construction:** semi-cap  
**Core:** poplar, paulownia, isocore  
**Material:** 3D construction shaped in H  
**Weight:** 3400g/pair @ 170.1  
3500g/pair @ 176.7

### accessible effective lighter

**description:**  
Best of the mid-fat touring skis, the **camox freebird** lively, catchy and light. Unable to blush at its success, this modern ski focuses all the expectations of a ski in a hurry to arrive at the top to express its superb potential for the descent. A sporty flex, classic camber and double rocker, all the pleasure of off-piste in a touring version.

**the nitty-gritty:**  
**Intermediate width:** 96mm wide at the tail.  
**Progressive front rocker and slight rear rocker:** pivot control, maneuverability, planing.  
**Medium classic camber:** classic camber underfoot with intermediate ski/snow contact (balanced maneuverability with stability).  
**Slightly raised tail:** Soft ending to curves, practical for touring (for fitting skins or sticking skis upright in the snow... not a unimportant point).  
**Intermediate flex:** a tolerant and comfortable ski.

**technical specifications:**  
**Construction:** semi-cap construction  
**Core:** paulownia  
**Material:** mixed glass and carbon fibers  
Titanal reinforcements under bindings.  
**Weight :** 2500g/pair @ 160.2

**light  
strong  
authentic**

**description:**

A breath of modernity has arrived to enrich the **orb freebird**, a ski which shouldn't be missed. Without demeaning its safe and versatile character on which its reputation has been built; it benefits from a general reduction in weight while maintaining an excellent skiability. Weight gain due to redressing the ABS and the refinement of the rocker lift offering it a better base and even better hold. It is also fitted with a titanal plate underfoot which increases the drill depth so as to adapt to the new hybrid bindings.

**the nitty-gritty:**

**Moderate width:** 90mm waist.  
**Front rocker & early-rise tail.**  
**Classic camber.**  
**Titanal reinforcement under mountain area.**  
**Intermediate flex: tolerant and comfortable skiing**

**technical specifications:**

**tough  
playful  
super light**

**description:**

The **ova freebird** is very light and easy to manoeuvre: a modern pure touring ski. Inside, the core is made of paulownia and a mixture of glass and carbon fibre, giving a core of 2250g in the 175cm length. As for shape, the **ova freebird** has a progressively raised tail, a soft sidecut and a tolerant flex, enabling it to pivot superbly without any sacrifice of performance on hard snow.

**the nitty-gritty:**

**Narrow width:** 85mm waist.  
**Light rocker:** stability, small pivot, good edge grip, float.  
**Extra long classic camber:** classic camber underfoot with an extended ski/snow contact for alpine-style turns.  
**Short turning radius (17m):** very agile on smooth surfaces and crud alike.  
**Moderate flex:** a tolerant and comfortable ski.

**technical specifications:**

**Construction:** cap

**precursor  
playful  
light**

**description:**  
Like its universal avatar, the **atris birdie** focusses on four things: stability, rapid edging, tolerant degree of flex and progressive tail rise. This combination means that these skis perform superbly at high speed without loss of maneuverability or sportiness. Lighter and a little more supple than the universal Atris, the atris birdie is the favourite choice of women freeriders who want skis that are effective in all conditions, on hard and deep snow alike.

**the nitty-gritty:**  
**Nice width:** 108mm waist.  
**Double rocker:** immediate pivot.  
**Medium classic camber:** classic camber underfoot with moderate ski/snow contact, a good balance between stability and maneuverability.  
**Slightly extended sidecut (20m radius):** more stability at high speed, balance between firmness and maneuverability.  
**Progressive tip rise:** good consistency during the turn and easy float.  
**Consistent and firm flex:** a very stable ski.

radius: 25

vertical  
exclusive  
hi-tech

## description:

The perfect ski for what you need on steep slopes. The Solis is the result of a long development on this kind of terrain, combining a flex that's the same all along the ski, a suitably firm tip and tail, and a long radius with raised tip. This combination gives unrivalled pivoting, avoids any oversteer in tricky slaloming, and has a tail that provides safety when your backpack is heavily loaded. The Solis also has a reinforced edge and a very good grip thanks to its Titanal plate underfoot. The Solis is an extremely specialized ski, perfect for skiers who love vertical drops.

## the nitty-gritty:

**Extra width** : 100 mm waist.

**Simple progressive front rocker** : to avoid oversteer.

**Long radius** : brilliant grip on hard snow, specially designed for steep slopes.

**Progressive tail and slight rear rocker** : for surer rear support and ease of pivoting.

**Light classic camber** : balances maneuverability with stability.

**Homogeneous flex throughout** : to avoid oversteer.

## technical specifications:

**Construction**: semi-cap

**Core**: paulownia, poplar

**Material**: Titanal plate underfoot,  
fiber glass and carbon tapes

Minimalist front attachment points for skins

**Weight** : 3900g/pair @180.0 cm

# dorsa 27

# dorsa 20

**description:**  
 An urban-inspired technical backpack designed to accompany skiers from the ski resort to high alpine routes. Developed in collaboration with Bruno Compagnet and the mountain guides of Chamonix, the **dorsa 27** responds to the needs of ski mountaineers: robust, minimal, light. Exactly what you need.

**technical specifications:**  
**volume:** 27 liters  
**material:** Cordura® fabrics  
**main features:**  
 2 openings, a main roll top to load & a front zip to find something easily at the bottom.  
 2 ice axe loops.  
 1 system to carry skis on sides.  
 1 system to carry skis in diagonal.  
 Comfy shoulder straps with dual density foams.  
 Removable hipbelt, adjustable with a metal buckle.  
 Sternum strap.  
 Inner pockets for shovel, probe and waterbag.

**description:**  
 The 20 litre Dorsa is a compact backpack developed by the Black Crows team for skiers on the skis slopes or on their off-piste journeys. Highly ergonomic, neat and tough, this advanced backpack carries all you need for a short off-piste adventure or a touring outing. Available in three colours, with two small twin pockets, it's a perfect balance of mountain functionality and urban chic. Once you've tamed it you'll never be without this new bird, summer or winter.

**technical specifications:**  
**volume:** 20 liters  
**material:** P600D fabric  
**main features :**  
 1 big opening at the top of the bag, for filling.  
 1 big front pocket with zip and 2 small stud pockets.  
 1 ice axe loop.  
 1 system for carrying skis slantwise.  
 Comfy shoulder straps with dual density foams.  
 Removable hipbelt, adjustable with a metal buckle.  
 Sternum strap.  
 Inner pockets for shovel, probe and waterbag.

# sacus

## description:

The name gives it away: the **sacus** is a bag that can carry a pair of skis, poles and a few accessories. Hard-wearing fabric to cope with the rigours of airplane cargo and winter journeys, boldly printed all over with "black crows" airline labels.

## technical specifications:

**volume:** enough to take a pair of skis and a pair of poles

**material:** P600D fabric

### main features:

- 1 big opening with zip.
- 1 adjustable shoulder strap.
- 1 handle.

**style code:** 02BASKBAUZZ16BLYZZA

# pilus new

## super light

### description:

New skins with this all new Pilus whose particularity is to have a fine membrane which protects and increases the watertightness of the glue. Solid and long-lasting, very practical and indifferent to changes in temperature, the Pilus are the ideal partner for gliding serenely towards happiness. **The Super Light** membrane provides a weight reduction, a 100% waterproofness and an excellent tear resistance. The glue remains efficient and durable. Hybrid composition (Mohair/Nylon) : best ratio between climbing grip and glide downhill + high durability. New construction with the first hydrophobic treatment (without fluor) : Chemical components reduction which does not affect performance while reducing its environmental impact.

### technical specifications:

**Plush material :** 70% mohair, 30% nylon, hydrophobic treatment PFC free, light membrane, efficient and durable glue.

### pre-cut sizes:

- 101268 - **pilus solis** (173/180)
- 101261 - **pilus ferox freebird** (170/176/181/186)
- 101262 - **pilus corvus freebird** (176/183/188)
- 101263 - **pilus navis freebird** (167/173/179/185)
- 101264 - **pilus camox freebird** (160/166/172/183/188)
- 101270 - **trim-to-fit** : 135mm x 190cm
- 101271 - **trim-to-fit** : 120mm x 185cm

## ultra light

### description:

**The Ultra Light** membrane provides a weight reduction even more important than the Super Light and also reduces its volume. This skin is perfectly adapted to our lightest models: Vastus, Ova et Orb Freebird. Hybrid composition (mohair/nylon): best ratio between climbing grip and glide downhill and high durability. New construction with the first hydrophobic treatment (without fluor) : Chemical components reduction which does not affect performance while reducing its environmental impact.

### technical specifications:

**Plush material :** 70% mohair, 30% nylon, hydrophobic treatment PFC free, glide treatment, ultralight membrane, efficient and durable glue.

### pre-cut sizes:

- 101265 - **pilus orb freebird** (161/167/173/179/184)
- 101266 - **pilus ova freebird** (162/170/175/180)
- 101267 - **pilus vastus freebird** (163/171)

# the skier's plumage

**As our clothing range evolves we're still determined to develop technically impeccable products in timeless designs.**

Imagined and experienced in the Chamonix mountains, this 20.21 collection of ski clothing confirms our desire to enrich all the nuances of free skiing; off piste, touring and expeditions. That's to say all the technical requisites for the mountains and high mountains with an assertive touch and always as intransigent when it comes to style.

**The corpus range**, aimed at ski freeride, piste and off-piste, exceeds a new plateau of technical excellence with meticulous attention to the detail of the ergonomics.

**The ventus range**, destined for mountain skiing and ski-touring, derives its identity from functionality and minimalism so as to answer to the ultra-specific needs of these activities.

As all black crow products, all these good intentions can not flourish without an exclusive identity.

Happy Skiing.

# corpus men - freeskiing

The corpus clothing reflects the contrasting art of black crows: minimalist, and highly technical, discrete with a strong identity.

“The corpus range was designed for freeride skiing with all the technical features required for a hostile environment, but also with a look which can be worn all winter long around town and for après-ski. Technical with a hint of elegance.”

**Camille Jaccoux**

# corpus 3L gore-tex jacket

**iconic  
very hi-tech  
elegant**

**description:**

Iconic model inspired by parkas, the corpus 3-layer **GORE-TEX®** jacket combines an ergonomic and functional design. Numerous details enhance its mountain aptitude, such as a collar isolated from the hood, a front arm pocket and wrist adjustments. Designed for high mountain and all terrain skiing, its sober exterior contrast with the details of its lining and is a perfect balance between elegance and technicality. Ride on.

**fabrics:**

**3L GORE-TEX®** 80D polyamide with cotton feel.

**features:**

- Adjustable helmet friendly hood.
- Hood retention system.
- Inner collar with brushed jersey.
- Water repellent zips.
- Two zippered chest pockets.
- Lens wipe cloth in chest pocket.
- Two hand pockets.
- Two zippered sleeve pockets
- Under-arm ventilation.
- Elastic snowskirt with silicone gripper elastic.
- Internal lycra cuffs with thumb loops.
- Internal security pocket.
- Internal mesh stow pocket.
- RECCO®** reflector.

# corpus insulated stretch jacket

# corpus insulated stretch pants

**ergonomic  
universal appeal  
warm**

**description:**

The Corpus stretch jacket with **Primaloft®** Silver insulation is aimed at piste skiing, all terrain and freeride. With its sober design and its new removable hood, this jacket allies a 4-way stretch fabric to a straight cut which creates an elegant silhouette and gives very agreeable freedom of movement. The minimal look of the exterior colour contrasts with the warm and silky lining decorated with infinite chevrons. Guaranteed non-hypnotic.

**fabrics:**

**Shell :** FlyingTex Polyester/Spandex 4-way stretch with waterproof and breathable membrane 20k/20k.  
**Chevron printed lining :** FlyingTex.  
**Insulation :** Primaloft® Silver

**features:**

Dual adjustable removable hood.  
Hood retention system.  
Zipped upper arm pocket.  
Zipped chest pocket.  
Lens wipe cloth.  
Two hand warmer pockets.  
Under arm zipped ventilation.  
Internal security pocket.  
Internal mesh stow pocket.  
Internal sleeve cuffs with thumbhole.  
Snowskirt with silicon gripper elastic  
**RECCO®** reflector.

**description:**

The Corpus stretch trousers with **Primaloft®** Silver insulation is aimed at piste skiing, all terrain and freeride. Minimal functional design and a new gentle 4-way stretch fabric which benefits as much their elegance as their freedom of movement. The minimal look of the exterior colour contrasts with the warm and silky lining decorated with infinite chevrons. Enough to turn your head.

**fabrics:**

**Shell :** FlyingTex Polyester (86%), Spandex 4-way stretch (14%) with waterproof and breathable membrane 20k/20k.  
**Chevron printed lining :** FlyingTex.  
**Insulation :** Primaloft® Silver

**features:**

Adjustable waist band with belt loops.  
Removable elastic waist snowgaiter.  
Two zipped hand pockets.  
One cargo pocket.  
Inside leg zipped ventilation.  
Internal elastic snow gaiters with silicone gripper elastic.  
Lower leg volume adjustment with press buttons.  
Reinforcement kick patches.  
**RECCO®** reflector.

corpus 3L gore-tex jacket

corpus insulated gore-tex jacket

# ventus woman - ski adventure

The line aimed for ski-tourers, those who like to go and look beyond the summits.

“The ventus has been designed by skiers who spend all winter skiing high up in the mountains and further afield.”  
**Bruno Compagnet**

# ventus hybrid alpha jacket

# ventus micro puff down jacket

**light  
strong  
functional**

**light  
strong  
compressible**

**description:**

Key element for skiing in the mountains, this hybrid jacket can be worn either as an intermediary or outer layer. Made of **Pertex®** outer fabric, a **Polartec® Alpha®** filling which gives warmth, lightness, comfort and side panels in a **Polartec® Powerstretch Pro®** fleeces gives this piece its highly breathable capacity. Loyal to our signature, we have added a touch of style in the ultra-functional technical item with a clean cut front topped with a fabric quilted with chevrons on the shoulders, body and hood. As for the lining of the sleeves, hood and back, the highly breathable fabric is decorated with the map of the Mont-Blanc massif in black and white chevrons. There you are, ready to go.

**description:**

The warmest intermediary layer of our women's range, this light, small, true down jacket will accompany you everywhere: ski-touring, freeride, ski-runs, après-ski and also away from the mountains. Designed for mountain skiing and made with a **Pertex®** ripstop fabric and stuffed with 750 goose down from Allied Feathers, RDS certified goose down, it can be worn under a three layer jacket or as an outer layer according to the circumstances. Folding into its interior pocket, it slides into the bottom of a pack to warm you up at the right moment. A classic black crows touch, its lining represents the map of the Mont-Blanc massif revealed in black and white chevrons.

**fabrics:**

**Shell :** Pertex® micro light stretch polyamide mini ripstop with water repellent finish.  
**Midweight :** Polartec® Power stretch® side inserts.  
**Insulation :** Polartec® Alpha®.  
**Insulation hood and shoulders :** Primaloft® Silver.  
**Lining back and hood :** Printed polyester stretch mesh with wicking properties.  
**Lining front and sleeves :** Pertex® micro light stretch mini ripstop.

**fabrics:**

**Shell :** Pertex® Quantum® polyamide mini rip stop.  
**Insulation body :** 750 fill RDS goose down.  
**Insulation hood and shoulders :** Primaloft® Silver.

**features:**

Fixed hood.  
 Zipped hand pockets.  
 Hem adjustment.

**features:**

Fixed hood.  
 Interior security pocket.  
 Two zipped hand pockets.  
 Hem adjustment.

black 002

**universal  
stylish  
VIP**

**description:**

A very limited edition of the, from now on, classic black crows' bomber developed here with a **GORE-TEX®** Infinium outer fabric and its unique feel. A becoming cut, and with **Primaloft®** Silver insulation, this bomber is destined to be worn as an intermediary layer under 3-layer jacket for skiing or changing in to a « tech-bomber » with the look of waterproof leather as soon as it is away from its original context. Comfortable to wear, its distinguished aesthetics and its lining clouded with chevrons of the Mont-Blanc massif, this jacket is much more than a very technical item, it is an unfailing ally day and night.

**fabrics:**

**Shell:** GORE-TEX® INFINIUM™  
**Chevron printed lining :** FlyingTex.  
**Insulation:** Primaloft® Silver.

**features:**

Zipped chest pocket.  
Two zipped hand pockets.  
Internal security pocket.  
Edge coast hem at neck, wrist and bottom.

**universal  
stylish  
transcultural**

**description:**

This jacket associates the insulation of **Primaloft®** Silver with a **Pertex®** ripstop outer fabric. An essential garment for skiing and peripheral activities, it is both an intermediary layer under a 3-layer jacket and changes into an elegant « tech-bomber » as soon as it is extracted from its original context. Comfortable to wear, its distinguished aesthetics and its printed lining of Chamonix and the Mont-Blanc massif, this jacket is much more than a very technical item, it is an unfailing ally in all situations.

**fabrics:**

**Shell:** Pertex® Quantum® polyamide mini rip stop with water repellent finish.  
**Chevron printed lining :** FlyingTex.  
**Insulation:** Primaloft® Silver.

**features:**

Stretch knitted rib fabric at neck and hem.  
Zipped chest pocket.  
Two zipped hand pockets.  
Internal security pocket.

# headwear unisex

# bolivia

**description:**  
 Universal joy. Unlike its name would suggest, it doesn't come from bolivia but was inspired by the beanies worn during the golden age of skiing. It would happily grace the head of a chevron- clad skier busting a 'daffy', an incredibly aesthetic, but unfashionable, trick which evokes fond memories every time we do it.

**fabrics:**  
 50% wool.  
 50% acrylic.

**pack ref:** 100883

**unisex**

# calva logo

**description:**  
 New hat 50/50 wool and acrylic, minimal style with no pompom or trimmings, but a large black crows' logo to warm the spirit and impress the endemic jet 7.

**fabrics:**  
 50% merino wool.  
 50% acrylic.

**pack ref:** 101149

**unisex**

# nomen

**description:**  
 Eternal youth. The nomen is inspired by vintage ski clubs and the sense of nostalgia one gets when thinking back to those early ski memories. In tri-colour block and topped off with a pompom, the nomen is designed to return the ski club to its former glory.

**fabrics:**  
 100% acrylic.

**pack ref:** 100882

**unisex**

# calva

**description:**  
 It's a game of shapes. This beanie can be worn two ways, rolled up or full-length. Say goodbye to boring symmetrical styles.

**fabrics:**  
 100% acrylic.

**pack ref:** 100885

**unisex**

# mori

**description:**  
Beautiful heavy knit beanie with a badge on the front. Warm and sober, tempts you into the wide open spaces – or, with a little imagination, onto the bus.

**fabrics:**  
47% merino wool, 30% viscose, 15% polyamide, 8% cashmere.
