

**THERM-IC**

**EMBRACE  
THE  
OUTDOORS**

The history of Therm-ic begins with a declaration of love – to the world’s most beautiful sport: skiing.

Back in the 70s, our founders were tired of hands and feet that refused to stay warm. Being cold is uncomfortable, annoying, painful and it can ruin a perfect day of skiing. So, they developed and improved a heated insole that could be used in any ski boot – or everyday shoe – and the Therm-ic brand was born.

Over the years, Therm-ic has become recognized across the world and our portfolio of patented products, for sports and leisure, as well as working shoes has grown.

The growth led to many things like permanent warmth for the hands and feet, insulation for the entire body and care products. In addition to products running on batteries or via Bluetooth, Therm-ic created environmentally friendly, non-electronic solutions as well.

Being cold is now a thing of the past.

# EMBRACE THE OUTDOORS

# THERMAL REGULATION FUN FACTS

**32°C**

Like the minimum core body temperature from which it becomes life-threatening.

**40,5°C**

Like the critical body temperature where hyperthermia poses a risk to life.

**3**

Like the number of layers of clothing you should put on before venturing into the mountains.

**1978**

Like the year the first cryotherapy chamber was developed, a nitrogen-cooled air injection box going as low as - 164°C.

**93%**

Like the percentage of skin thermal sensors sensitive to cold.

**60%**

Like the percentage of heat loss from the human body by radiation..

**10**

Like the number of muscular micro-contractions per second when shivering.

**1500-1700  
kcal/jour**

Like standard daily heat generation for a woman/man.

**200  
kcal/jour**

Like daily heat generation relating to breathing alone.

**75%**

Like a muscle's loss of power and endurance when it drops in temperature.

**1,7L**

Like the volume of sweat lost without specific physical activity when it's hot.

**2L**

Like the average fluid loss over 1 hour of relatively brisk physical effort.

# THERMAL REGULATION AT THE HEART OF OUR PRODUCTS

Three levels of warmth to meet every need.

## WARM

Products from the **WARM** range are insulating and warm, whilst also being lightweight, providing comfort throughout the day.

## EXTRA WARM

Products from the **EXTRA WARM** range are designed to provide warmth for those particularly sensitive to the cold. We have chosen the warmest natural and synthetic fibres to retain maximum warmth and ensure constant insulation.

## ULTRA WARM

The **ULTRA WARM** products provide the most warmth out of all of our ranges. They incorporate heating elements connected to Therm-ic batteries, which can provide up to 16 hours of warmth. They also have Bluetooth functionality and can be controlled from the Therm-ic app on all types of smartphone. The best solution for those most sensitive to the cold!

## 3 SEGMENTS OF ACTIVITY

### SNOW SPORTS

Snowsport: Enjoy fully your winter activities with Snowsports' latest line. Our jackets, socks, gloves and insoles are technical, breathable and lightweight. They'll allow you to keep snug and warm.

### OUTDOOR ACTIVITIES

Outdoor Activities: There's nothing better than being in the heart of nature to feel good, but when the temperature drops, it can lose its appeal. The Outdoor Activities line is lightweight and resistant, and will quickly warm you up so you can make the most of your outings.

### EVERYDAY OUTSIDE

Everyday Outside: Because the cold doesn't just affect sporty types, the Everyday Outside range offers warm and comfortable products, perfect for day-to-day use. Heading out on foot or on a bike will no longer be a chore!

# LEVELS OF WARMTH

Three levels of warmth for every sport and to meet every need.

## COMFORT

For casual sportspeople seeking a comfortable product with a lower technical specification. These products primarily provide warmth, protection, and comfort.

## SPORT

For those who do regular exercise and take part in relatively intense sports activities. The products are warm, but also lightweight and breathable.

## PERFORMANCE

For sports enthusiasts seeking warm, technical, breathable and lightweight products.

# HEAT CONTROL

Treat yourself to a complete solution and connect your Therm-ic products to your phone!

With our batteries' new Bluetooth® function and the **Therm-ic Heat Control** mobile app, you can check and adjust the heat setting for your socks, insoles and gloves in real time using your smartphone.

You can also link your product's performance to your activity, i.e. skiing, hiking, trail activities, running, mountaineering, trekking, etc. Share Therm-ic with your friends and family! The **Therm-ic Heat Control** app allows you to add and manage up to four user profiles and four Therm-ic heating products. The Bluetooth® function is wonderfully convenient and makes your batteries easier to use.

- **Free app**
- **Suitable for use with Smartwatch iOS & Android**
- **Works with Therm-ic S-Pack, C-Pack, U-Pack and I-Pack Bluetooth® batteries**

## HOW DOES IT WORK?

Check out our video with all the instructions to properly use the product.

# THERM-IC

INSIDE

Therm-ic Inside is the official partner of major sports brands. Therm-ic has worked alongside manufacturers of sporting goods and other major brands for several years on the integration of heating systems into their products at the early stages of the production chain. These brands have thus drawn on Therm-ic know-how and technology to boost their customers' well-being.

## FOOT WARMERS

(box of 20 pairs) T31-0500-010

(box of 5 pairs) T31-0500-011

S M L XL

Foot Warmers, a simple, effective solution for avoiding cold feet! Slim and practical, our foot warmer insoles can be used for all kinds of outdoor activities. The range of sizes ensure the best fit for your foot, and their adhesive surface area will keep the warmer in place throughout all your activities. The insoles provide 8 hrs' heat from when their packet is first opened.

- **EASY TO USE:** Once the packet is open, shake the warmer to begin releasing the heat.
- **8HRS' HEAT:** The insoles provide 8 hrs' heat from when their packet is first opened. All-over, effective heating for any activity.
- **NATURAL INGREDIENTS:** composed of natural ingredients such as coal, water and salt.

## POCKET WARMERS

(box of 20 pairs) T31-0200-010

(box of 5 pairs) T31-0200-011

Practical outside, these hand warmers are the perfect companions for all outdoor activities. Simply open the packaging and place the warmers in the pouch. A pleasant heat will be felt in just a few minutes and last for up to eight hours.

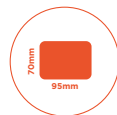

## TOE WARMERS

(box of 20 pairs) T31-0100-010

(box of 5 pairs) T31-0100-011

Specially designed for toes, these warmers fit the shape of the foot perfectly. The Toe Warmers are ultra-thin and suitable for any type of outdoor activity. Simply open the packaging and stick the warmers to the socks in the forefoot area. The warmer will begin to heat up very quickly and stay warm for up to six hours.

**THERM-IC**

# **COLD HANDS**

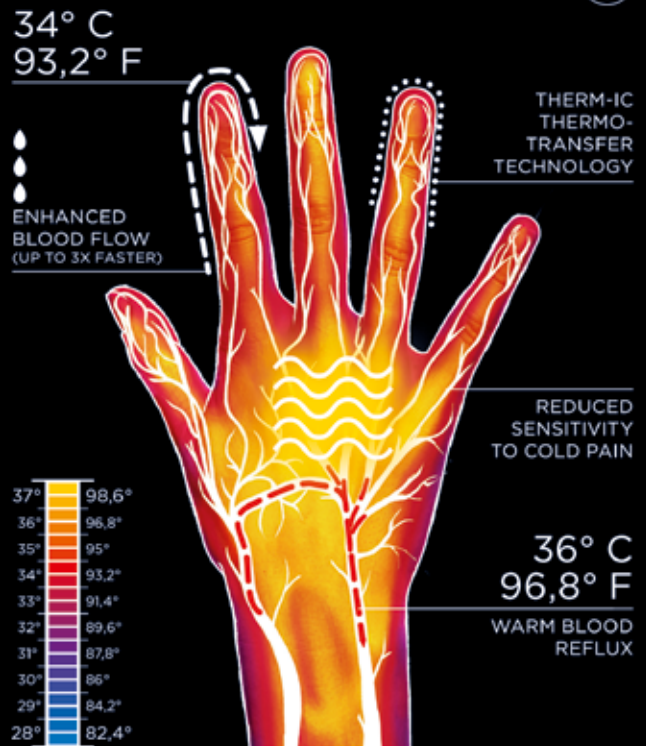

# HANDS CHALLENGE COMPARISON

By their very nature, the fingers receive less blood than the rest of the body. Fingers are slim, particularly in women, with virtually no fat or muscle and a blood flow speed 1000 times slower than at the centre of the body. Fingers are much more sensitive so when exposed to the cold without protection or insulation, you'll soon feel pain.

## WITHOUT THERM-IC

## WITH THERM-IC

### THERM-IC THERMO TRANSFER TECHNOLOGY: KEEPS THE FINGERS WARM.

Therm-ic gives you what nature can't. Therm-ic products will gently warm your fingers, restoring the necessary blood flow for ultimate sensation and well-being.

# MITTENS WARMER READY

## Mittens to quickly and easily warm your hands.

Warmer Ready mittens are designed with a zip pocket on the side. This allows you to insert your Custom Warmers for a better fit and better heat conservation.

The pocket is made with heat-reflective fabric at the top to keep the heat in the glove, and a thin fabric at the bottom for maximum heat conduction. The zip also keeps the pocket airtight. For use with the handy Therm-ic Custom Warmers.

Available in adult and kid sizes.

- Durable Water Repellent (DWR) treatment
- Insulating hyperloft palm: insulating hydrophobic material
- Handy pouch to hold the warmer in place.
- Simple and easy to use
- Up to 4 hours of heat
- Optimised distribution of heat
- Zip fastening on the airtight pocket
- Available in 3 colours: Blue / Lime / Pink
- Includes one pair of free warmers

## Custom Warmers

Custom Warmers are smaller for easy insertion and improved hold in the pocket.

- Warmer dimensions: 60 x 80 mm
- Up to 4 hours of heat

## SLIM UNIVERSAL POWERBANK

T41-0702-001

Powerful battery: more than 5000 mAh for a complete charge of your products.

- Smart lights: the 4 blue LEDs indicate the remaining capacity of the charger.
- Smart IC smart charge: detects your type of device so as to charge it as quickly as possible, up to 2.1A.
- Compatible with devices powered with 5V via a USB cable: iPhone, iPad, Smart phones and all Therm-ic products.

## POWERBANK

T41-0701-001

Powerful battery: more than 5200 mAh for a complete charge of your products.

- Smart lights: the 4 blue LEDs indicate the remaining capacity of the charger.
- Smart IC smart charge: detects your type of device so as to charge it as quickly as possible, up to 2.4A.
- Compatible with devices powered with 5V via a USB cable: iPhone, iPad, Smart phones and all Therm-ic products.

## U-PACK

T41-0701-002

The USB cable allows you to activate the Therm-ic jacket's Bluetooth® so you can control its heating function via the Therm-ic heat control app. When the jacket is not connected to the app, the heating power will be at its maximum. By connecting the jacket to the app, you can control the heating power by choosing a suitable setting.

**The U-pack cable is delivered with all heated jackets.**

With our batteries' new Bluetooth® function and the **Therm-ic Heat Control** mobile app, you can check and adjust the heat setting for your socks, insoles and gloves in real time using your smartphone.

## POWERJACKET SPEED MEN

T47-0400-001

Warm red

S M L XL XXL

**The first heated ski jacket with PrimaLoft and Windblocker. The most technically efficient and high-performing heated jackets**

A heated jacket designed for winter sports. Its heated elements are fed by a Bluetooth-controlled battery. The Thermic heating technology fights extreme cold by spreading heat evenly through its 6 heating elements placed on the stomach and back.

The Thermic Windblocker membrane on the front protects you from the wind whilst the PrimaLoft lining ensures good insulation and breathability.

- **ACTIVE HEATING:** 6 heating areas evenly spread between back and torso providing a pleasant, all-over warmth. Very easy to use - the heating is activated by plugging in your external usb cable (not provided) on the cord inside of your pocket.
- **INTEGRATED BLUETOOTH:** Also works in Bluetooth mode so that you can easily adjust the desired heat from your smartphone. Simply plug in the U-Pack cable provided and plug it into the usb cord in your pocket. You can also manage your jacket's heat by downloading our free app: Thermic Heat Control.
- **INSULATED AND BREATHABLE:** it has a Thermic Windblocker membrane on the front, which blocks the wind whilst providing optimum breathability. Its PrimaLoft lining is unmatched in terms of insulation and breathability.

# HEATED JACKET

**The first heated jacket that combines function and style. A heated jacket combining functionality and style.**

A heated jacket suitable for all your winter activities. The Therm-ic heating technology fights extreme cold by spreading heat evenly through its 5 heating elements placed over the stomach and back. Very easy to use, the heating is activated by turning on the external charger (powerbank) on the usb cord in the inside of the pocket. Its snug cut ensures the utmost comfort.

- **Heated:** 5 heating areas evenly spread between back and torso providing a pleasant, all-over warmth. Very easy to use, the heating is activated by plugging in your external usb cord (not provided) on the cord on the inside of your pocket.
- **Integrated Bluetooth:** Also works in Bluetooth mode so you can easily adjust the desired heat intensity from your smartphone. Simply plug in the U-Pack cable provided and plug it into the usb cord in your pocket. You can also manage your jacket's heat by downloading our free app: Thermic Heat Control.
- **Easy to use:** works with an external usb battery (not provided). We recommend using the Thermic Powerbank due to its compact shape and its capacity. Works simply by plugging into the usb cord in the jacket's pocket.

# HEATED JACKET

- Detachable hood
- YKK zip
- Long, comfortable sleeve cuffs
- Micro-fleece anti-irritation chin protector

S M L XL XXL XXXL

The Therm-ic heated down vest is perfect balance between design and wellbeing. Heated gilet, ideal for full enjoyment of your outdoor activities. The 5 heating areas distributed throughout the jacket provide gentle, uniform warmth. Very thin and lightweight, it can be easily worn under another garment. Works with all external chargers (not included).

- 5 ultra-thin heating elements, allowing for good heat distribution around the stomach, pockets, kidneys, and back.
- Compact and lightweight, you can easily fold up your jacket and save space in your bag.
- Jacket made without materials of animal origin.
- Ideal for full enjoyment of your outdoor activities whatever the season.
- How to use the jacket? Connect the external charger (not included) to the USB cable on the interior of your pocket and slide it inside the jacket. The heated jacket is compatible with all external chargers. The Therm-ic universal external charger is recommended.
- Estimated heating time according to the power bank's capacity. Therm-ic Powerbank: 5 hours.
- Washing instructions: You can wash your jacket in the washing machine, do not forget to put the cap on the USB connector!

**THERM-IC**

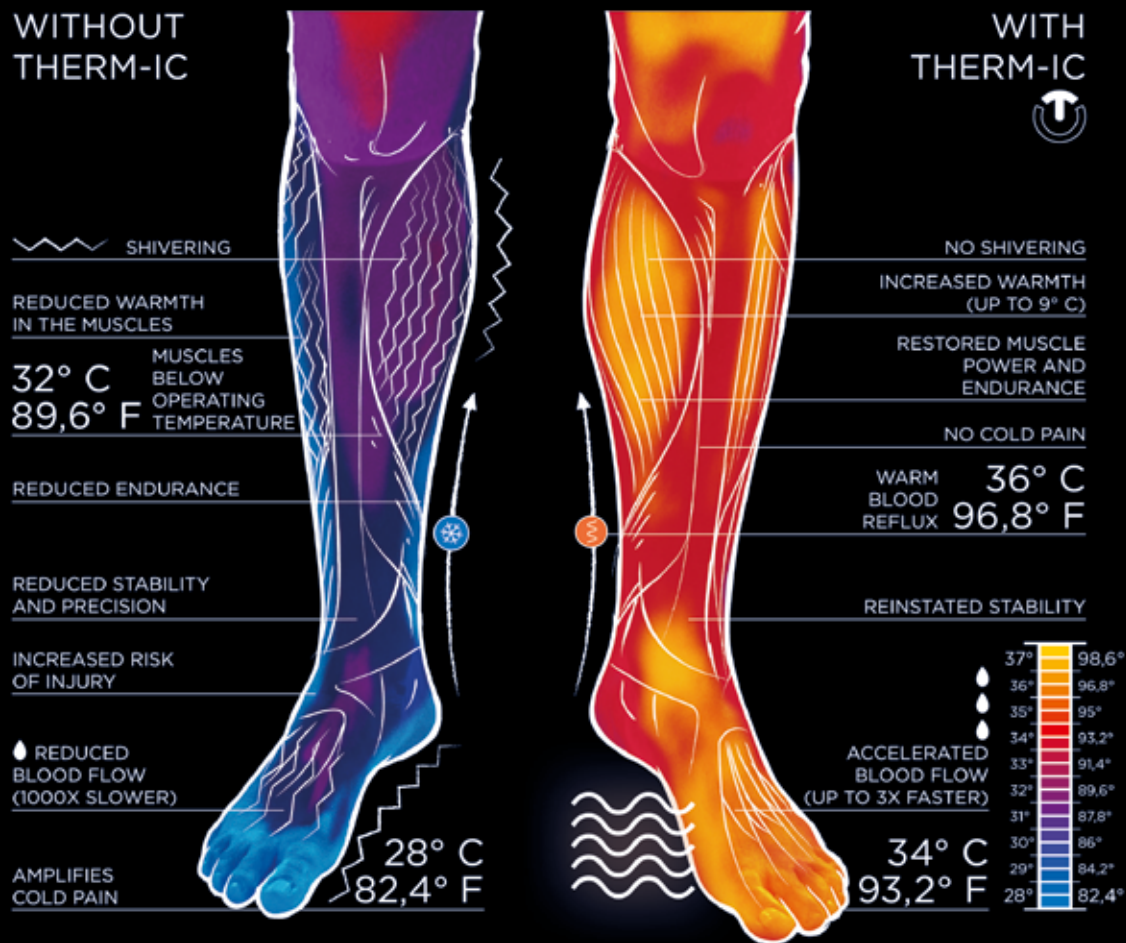

# **COLD FEET**

# MUSCLE POWER AND ENDURANCE COMPARISON

## WITHOUT THERM-IC, 75 % OF MUSCLE POWER AND ENDURANCE IS LOST

75 % of our muscle mass falls victim to the cold. When we begin to feel cold, the pain signal is sent to the brain and more than 90 % of available energy is used to warm up the affected muscles. The result is shivering and reduced muscle power and endurance.

## THERM-IC THERMO TRANSFER TECHNOLOGY RESTORES MUSCLE POWER AND ENDURANCE

The THERM-IC products instantly deliver the required heat to critical areas.

Muscle power is restored, blood flow stimulated and shivering ceases. With Therm-ic, you'll be back at full physical and muscular strength with a reduced risk of injury.

T25-1300-001  
Blue & gold

35/38 39/41 42/44 45/46

**A unique mix of fibers for optimum heat conservation.**

Merino wool ski socks that stay warm.

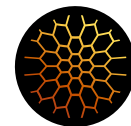

A unique mixture between soft and warm Merino wool, plus the Therm-ic warm reflector: a fiber that conducts and reflects the generated heat. This innovative mixture of fibers keeps the foot warm whilst maintaining the best possible air circulation. A unique combination for the best skiing experience.

- **Therm-ic Warm Reflector:** high-performance fiber that reflects and conserves the heat generated by the foot. Its structure ensures good air circulation and releases moisture.
- **Merino Wool:** fine, warm, soft wool of a very high quality
- **Anti-moisture:** releases sweat and dries quickly.

**Materials: Acrylic 32%, Polyester 25%, Polyamide 21%, Wool Merino 10%, Polypropilene 10%, Elastane 2%**

- Heel and toe reinforcements
- Protects the tibia, shin and instep
- Elastic band to give the ankle good support
- Micro-aerated foot arch for good moisture release
- Anatomical shape: specific left foot and right foot construction for good hold on the foot
- Knee height

# INSOLES

## INSULATION AIR

T24-0100-102

XS S M L XL XXL

The Insulation Air insoles offer lasting protection against the cold with their three-layer insulation concept to keep your feet warm. The memory foam creates the insulating layer of air, which is essential to all insulation. The soles also contain a rubber-based material to guarantee stability.

## INSULATION 3D

T24-0100-103

XS S M L XL XXL

Warm and insulating anatomical insoles. Designed with high-quality materials, they offer the utmost comfort and good stability in your footwear. The 3D shape supports the arch and improves blood flow to keep the feet warm. Specially designed for winter sports.

ULTRA WARM ⚡

SNOW SPORTS

# INSOLES

## HEAT FLAT

T44-0100-001

Very thin heated insole that is easy to cut in order to adapt it to your shoe size and boots. High-quality heating element to keep the foot at an ideal temperature.

Slips easily into snow and ski boots.

- Suitable for use with Therm-ic C-Pack battery range only.

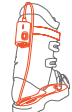

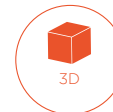

## HEAT 3D

T44-0100-003

XS S M L XL XXL

Heated insole with a 3D anatomical shape for perfect hold. Stable support for a better distribution of pressure. High-quality heating element to keep feet at an ideal temperature. Outer cable for perfect positioning in any footwear. EVA foam structure.

- Suitable for use with Therm-ic C-Pack battery range only.

### SMALL HEATED POS INSOLES

T10-0900-035  
Feel the warmth of a heated Therm-ic insole. Includes the Heat 3D insole.

ULTRA WARM ⚡

SNOW SPORTS

# INSOLES

## HEAT KIT

T44-0100-002

Heating elements to integrate into your insoles. The ultra-thin heating elements integrate perfectly into any type of insole.

Self-adhesive textile lining to cover the heating element and guarantee the utmost comfort.

- Suitable for use with Therm-ic C-Pack battery range only.

Find the C-pack battery user manual on the [therm-ic.com](http://therm-ic.com) website.

# BATTERIES INSOLES

C-Pack batteries are suitable for use with Therm-ic heated insoles, providing up to 17 hours of heat.

- Comes with a single control button
- Pack comes with a USB charger
- Wall charger not supplied
- Suitable for use with Therm-ic Insoles Heat Flat, Heat 3D and Heat Kit range only.

## C-PACK AA

T41-0101-500

### Batteries for heated insoles

The AA C-Pack is the ideal alternative to classic Therm-ic batteries, without compromising the quality of warmth. They work with rechargeable AA batteries and provide 3 heating levels so that you can control the level that you require.

Works with rechargeable batteries only.

- **3 HEATING LEVELS:** Three heating levels are available to adapt the level of heat to your requirements.
- **AA batteries:** simple and practical to use. Simply incorporate the rechargeable AA batteries (not included).
- **STRONG:** this battery is compact and strong, designed to withstand any kind of impact.

# BATTERIES INSOLES

## C-PACK 1300

T41-0101-100

The best value for money, this C-Pack 1300 battery pack comes with three heat settings to help keep your feet warm all day long.

- Warm feet for up to 13 hours

## C-PACK 1300 B

T41-0101-200

With the C-Pack 1300 Bluetooth® battery, you can control the strength of your heat remotely using your smartphone.

- Warm feet for up to 13 hours

## C-PACK 1700 B

T41-0101-300

The C-Pack 1700 B batteries are the most effective in the range and thanks to the Bluetooth® function you will be able to control the intensity of your heat remotely.

- Warm feet for up to 17 hours

## What are the benefits of the USB charger?

- Fits all adapters with USB ports
- Fast charging with a 5V/2A charger
- Universal
- Easy to transport
- Easy to recharge: cigarette lighter socket, wall socket, powerbank...

## CHARGER AND AC OUTLET

(incl. country-specific adapters)

## POWERLINER

T02-0400-001  
Black/orange

23.5 24.5 25.5 26.5 27.5 28.5 29.5

This heated liner fits perfectly within your boot shell. The heat controls sit directly on the shin for easy access, even when skiing. It has never been easier to integrate a heating element into a ski boot.

- Optimised fit for most ski boot shells
- Easily accessible heat controls on the tongue
- Use of high-quality materials
- Three heat setting controls
- Extremely lightweight and imperceptible lithium-ion batteries for up to 19 hours of heat
- Easy access to the charging outlet

**THERM-IC**

# SHOE ACCESSOIRES

# CARE SYSTEM

Your body consumes huge amounts of energy to keep your boots and gloves dry – energy which cannot then be used to keep you warm and maintain your physical strength.

The THERM-IC CARE SYSTEMS are there to help you.

With the Therm-ic concepts, your shoes and gloves will dry overnight to prevent your body from unnecessarily wasting energy. The THERM-IC CARE SYSTEMS REFRESHER product also prevent the growth of the bacteria responsible for unpleasant smells. By the morning, the natural freshness of your shoes and gloves will be restored.

# SHOE DRYER

**NEW**

Use the Therm-ic Care systems after your sporting activity.

The hygiene devices prevent the development of bacteria and germs while maintaining optimum heat inside your shoes. In just a few hours, ski boots and sports shoes will be dry, heated and ready for use.

## THERM-IC UV PODS DRYER

T48-0500-001

**The smallest shoe driers of the range.**

Handy-sized and easy to use, the UV Pod Dryer is the ideal companion to slip into your bag. After you have finished using them, it will dry your gloves and shoes within a few hours.

- **COMPACT:** thanks to their small, round shape, they don't take up much room.
- **MULTI-PURPOSE:** they fit all types of shoes and gloves.

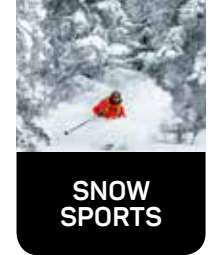

## THERMIC UV WARMER

T48-0300-007

- Warms and dries boots (and even gloves) within a few hours
- Optimum heat circulation
- Innovative design
- Reaches operating temperature within a few minutes
- Overheating protection
- Fits all types and sizes of shoes and gloves

# SHOE DRYER

**NEW**

## THERM-IC DRYER +

EU: T48-0400-001  
US: T48-0400-002  
UK: T48-0400-003  
(AUS / NZ): T48-0400-004

### The extendable shoe-dryer.

The Dryer+ dries boots and other footwear in just a few hours. The long, adjustable tubes blow air down to the tips of your boots, for optimum drying. Easy to use, plug the Dryer+ into the wall socket and press the button to start.

- Simple and compact: easy to handle and install. Adjustable tube length, to fit any type of footwear.
- Anti-moisture: by drying your boots quickly, it prevents moisture building up, keeping footwear healthy with fewer bacteria. Its tapered tip enables it to get to the ends of your shoes for complete, uniform drying.
