

Dear DPS Dealer,

I hope this message reaches you safe and healthy.

After several months of being closed, local retail stores are starting to reopen for business with employee and customer safety top-of-mind. In many locations, this means face protection for both sales staff and customers. DPS would like to help you get back to business safely by offering medical grade plastic face shields and cloth face protection.

As you may know, with the recent needs in the medical community, we have pivoted some of our ski manufacturing equipment in our Salt Lake City factory to produce clear plastic face shields. We are proud to say these are made in the USA, and are now available to our retail partners at a cost of \$5.00/unit.

The popular DPS Bandito, a lightweight fabric neck tube that can serve as face protection, is also available for order at a cost of \$14.48/unit.

At this moment, we carry on with relentless passion in our pursuit to provide innovative products for you, our trusted partners. The soul of DPS and our faithful community is deep and spirited. We are thankful for you, and wish you the best as you reopen your store. For more information on the above products or to place an order, please email: dpsmedical@dpskis.com

Best,
The DPS Crew

DPS Protective Shield

To do our part to help protect front line workers in the fight against COVID-19, the DPS engineering and manufacturing team rapidly mobilized to convert production lines to produce medical protective face shields. This was a direct request from the Utah Department of Health and the Governor's Office as part of the statewide COVID-19 rapid response efforts.

We've swiftly cultivated a collaborative partnership with Goal Zero, Petzl, and Eastman Machine Company to fund a sustainable, immediate production plan of face shields for healthcare workers in Utah and medical facilities across the country. We are currently in production to deliver 40,000 shields to the Utah Department of Health, with our first delivery April 14th.

- High visibility PET, multi-use shield
- Adjustable, detachable, washable, and high performance headband
- Detachable harness system, which allows for cleaning and shield replacement if needed.

Face Shield Specs

- 1.5" wide elastic and UHMPWE harness system is adjustable from 13.5" to 25.5" circumference
- Face Shield: 12.25"x0.012" PET
