MSRP: \$10

POWERED BY:
cupron
Powerful Antimicrobial
Technology

MASK CONTENTS:
55% Cotton
30% Cupron® Nylon
13% Nylon
2% Spandex

WHAT IS CUPRON?

Cupron is a copper-based antimicrobial technology that is embedded in garments. The technology's unique properties provide anti-odor and anti-bacterial benefits to the embedded fabric. Unlike topically applied solutions, the **Cupron** technology does not wash off or rub off. Cupron enhanced fabrics kill bacteria, fungus and microbes on the mask that cause odor.

HOW TO WEAR:

Slide over the top of your head instead of behind your ears.

REUSABLE & WASHABLE
Machine washable fabric.

SAVE YOUR EARS
Stretchy, light weight design helps eliminate the discomfort behind your ears by slipping over your head instead of behind your ears.

ANTIMICROBIAL
Cupron provides a patented Antimicrobial technology that does not wash or rub off.

FLEX FIT TECH
Seamless 3D Form Fitting construction allows for a comfortable wearing experience.
